Digital Tv Over Broadband Harvesting Bandwidth:

Digital TV Over Broadband Joan Van Tassel, 2013-10-08 Digital TV Over Broadband Harvesting Bandwidth offers a clear overview of how technological developments are revolutionizing television. It details the recent shift in focus from HDTV to a more broadly defined DTV and to the increasing importance of webcasting for interactive television. Digital Television examines the recent industry toward a combination of digital services including the use of the new bandwidth for additional channels of programming as well as some high definition television. The book discusses the increasingly rapid convergence of telecommunications, television, and computers and the important role of the web in the future of interactive programming. This new edition not only covers the new technology but also demonstrates practical uses of the technology in business models.

Interactive Television Production Mark Gawlinski, 2013-01-25 Interactive Television Production is essential reading for all broadcasting and new media professionals whether in production, marketing, technology, business, or management. It will also be of interest to media students and anyone looking to get an insight into the future of television production. It provides a practical step-by-step guide to the processes and issues involved in taking an interactive television idea through to being an operational service based on the knowledge and experience of leading interactive television producers. This book can be used as a quick and easy reference guide with each chapter containing a Chapter in 30 seconds summary for easy reference or read from cover to cover. Using accessible language, the author provides detailed descriptions of iTV software technologies, OpenTV, MHEG 5, TV Navigator, delivery technologies, cable, satellite, and terrestrial and production tools. There are also entire chapters devoted to key issues like the commercial side of iTV and the latest work on usability and design. The accompanying web site www.InteractiveTelevisionProduction.com contains useful links designed to help with common iTV questions and issues. There are also entertaining quizzes for each chapter that let you test your knowledge of the concepts introduced in the book.

Global Currents Tasha G. Oren, Patrice Petro, 2004 Rhetoric about media technology tends to fall into two extreme categories: unequivocal celebration or blanket condemnation. This is particularly true in debate over the clash of values when first world media infiltrate third world audiences. Bringing together the best new work on contemporary media practices, technologies, and policies, the essayists in Global Currents argue that neither of these extreme views accurately represents the role of media technology today. New ways of thinking about film, television, music, and the internet demonstrate that it is not only media technologies that affect the cultures into which they are introduced; it is just as likely that the receiving culture will change the media. Topics covered in the volume include copyright law and surveillance technology, cyber activism in the African Diaspora, transnational monopolies and local television industries, the marketing and consumption of global music, click politics, and the war on Afghanistan, the techno-politics of distance education, artificial intelligence, and global legal institutions, and traveling and squatting in digital space. Balanced between major theoretical positions and original field research, the selections address the political and cultural

meanings that surround and configure new technologies
