forward a bit and my dad bought an Atari 800 computer that I somehow convinced him was better than the Apple alternative. Needless to say I used the Atari more than he did. Fast forward a bit more and I was in college studying computer science. When I graduated my first real job was programming expert systems. That job only lasted a short while and then I became a System Analyst working on all sorts of Government Projects. In 2008 I moved to a place called Austin and really got my feet wet designing websites for clients. During that time I also became interested in all things SEO but never really got to flex my muscles. It wasn't until 2016 that I found myself unemployed and wondering what I should do in life. After countless resumes failed to get traction in the job market for positions I was interested in a realization hit me that maybe I don't need a company to work for but rather work for myself. My wife Kathleen and our pug Olaf were very supportive of the idea. So I started a company called <http://HangTenSEO.com> with the goal to help clients out rank their competition. Along the way I also started writing articles on SEO best practices which were in many ways teaching moments for me. In writing the articles I really had to understand the subjects I was writing about and how to use the techniques to get the best results.
