Inverse Boundary Spectral Problems Alexander Kachalov, Yaroslav Kurylev, Matti Lassas, 2001-07-30 Inverse boundary problems are a rapidly developing area of applied mathematics with applications throughout physics and the engineering sciences However the mathematical theory of inverse problems remains incomplete and needs further development to aid in the solution of many important practical problems **Inverse Boundary Spectral Problems** **Current Problems in Higher Education**, 1959 **Transactions of the American Institute of Electrical Engineers** American Institute of Electrical Engineers, 1908 List of members in v 7 15 17 19 20 Catalogue of the Officers and Students of Mercer University Mercer University, 1926 **Mathematical Reviews**, 1995 **Announcement of Teachers College, Columbia University** Columbia University. Teachers College, 1921 **Mathematical Models for Eddy Currents and Magnetostatics** Rachid Touzani, Jacques Rappaz, 2013-10-01 This monograph addresses fundamental aspects of mathematical modeling and numerical solution methods of electromagnetic problems involving low frequencies i e magnetostatic and eddy current problems which are rarely presented in the applied mathematics literature In the first part the authors introduce the mathematical models in a realistic context in view of their use for industrial applications Several geometric configurations of electric conductors leading to different mathematical models are carefully derived and analyzed and numerical methods for the solution of the obtained problems are given Related issues such as convergence of the approximations and error estimates are discussed The second part of the monograph presents various coupled problems that involve eddy current or magnetostatic problems in particular magneto hydrodynamic problems and magnetic shaping problems concerning the melt flow of electrically conducting metals induction heating processes inductively coupled plasmas and ferromagnetic screening modeling The presentation of each model comes with numerical illustration from industrial applications Computational Electromagnetics Carsten Carstensen, Stefan Funken, Wolfgang Hackbusch, Ronald W.
