

Strategies to Support Gifted and Talented Students

What are Gifted Students?

The Ministry of Education identifies giftedness as a range of special abilities such as general intellectual abilities, specific academic aptitudes, cultural abilities and qualities, creative abilities, social and leadership abilities, physical abilities, emotional and spiritual qualities, and abilities in the visual and performing arts. Gifted students are identified as those who have a high level of performance in one or more

Gifted and talented students are all unique. There is no one size fits all approach to teaching gifted and talented students. Each student will vary in their abilities, interests, personality and background.

Gifted and talented students require and are entitled to adjustments and differentiation in their learning.

Provide Differentiated Learning Content

- Use topics of interest to the students. For example, challenging reading materials.
- Create study contracts.
- Create research tasks that are open-ended or prompt a question that provides opportunities for open-ended thinking.
- Encourage creativity and risk taking.
- Allow for a variety of completed projects, e.g. direct the student to a list of products or tasks.

Encourage Learning Goals

- Encourage a classroom that has flexible learning spaces.
- Create specialized learning centres that allow for group, pair or individual work.
- Create an interest centre. Allow time throughout the school day for the student to create materials to display in the learning centre.

Encourage Opportunities

- Look at student placement options.
- Encourage students to enter competitions, including contests of talent.
- Provide opportunities for the student to work with other like-minded learners who have similar interests. This may include working with others in different year groups.
- Provide a classroom environment where humour and creativity are encouraged.
- Encourage and seek out mentors for students who have specialist knowledge in the topics of interest to the student, e.g. if the student is interested in computer science, set up what is known as a 'group' with a mentor in the field.
- Create enrichment clusters, e.g. a group of students with a group interest in wildlife could all be brought together each week at a set time to work with specialist enrichment activities.
