Brain Child How Smart Parents Make Smart Kids:

Brain Child Tony Buzan,2003 Tony Buzan the biggest name in memory takes a fascinating and exuberant look at the enormous potential of a child's brain and provides parents with the practical tools they need to help their children achieve it. Mind maps, memory games and other techniques allow parents to encourage learning and development for children of all ages. With Tony Buzan it's all brain, no pain. Research shows that the time and energy you dedicate to your child in the first five years pays off dividends for the next ten. With competition for the best schools stiffening parents, having children later and being more aware of the part they must play in their child's education, there is more and more demand for practical resources like *Brain Child*. Tony Buzan, world renowned inventor of Mind Maps, has written the ultimate operations manual to help parents liberate their child's true brain potential. He explains how the brain develops and the simple things you can do to stimulate your child's multiple intelligences including social, creative, numerical and physical, and unlock his or her natural genius. Bring out the Leonardo or Einstein in your child. Share fun memory games, number skills and Mind Maps. Raise your child to be happy and confident. Learn new ways of talking to and reading with your child. Let your child love numbers as well as words. Watch him or her excel at school and succeed in life. All parents who pick up this book will be inspired and empowered by Tony's understanding of their child's brain and what they can do to fulfil his or her true potential. *Su hijo es un genio* Tony Buzan,2005 Buzan explica la evolución del cerebro infantil desde su fase embrionaria y proporciona consejos sencillos y eficaces para estimular las múltiples inteligencias del niño entre ellas la social, la creativa, la numérica y la física y desarrollar su genio. *Learning Styles and Inclusion* Gavin Reid,2005-09-09 Gavin Reid provides some useful links to websites devoted to different approaches. Some of the ideas relating to specific areas of the curriculum, for example the suggested approaches to the teaching of modern languages, are likely to be particularly valuable. Reid also outlines strategies using learning styles for pupils with learning differences including attention disorders, dyslexia, developmental coordination difficulties, number difficulties and those on the autistic spectrum. *Times Educational Supplement Extra for Special Needs*. We have been lucky enough to hear Gavin speak twice in the last year and those of you who have also heard him will know that he is at the cutting edge of his field. This book really encompasses those areas that are particularly topical and the buzz words on everyone's lips. This book clearly sets out who is involved in inclusion and what is actually meant by learning styles. Gavin not only offers practical strategies but also suggests how old hands could vary their teaching styles to appeal to all types of learners. Therefore we feel this book is for the mainstream teacher as well as the specialist and if this is a target area for your school, this book might be a valuable addition to your bookshelf. *SATIPS*. In this book Gavin Reid has grasped the nettle of inclusion with both hands and provided a text that is full of common sense and practical suggestions as to how the mainstream teacher can draw upon recent psychological theory and research to enhance the learning of all children. He jumps on no bandwagons but draws judiciously from a wide range of approaches to assessing learning styles and links what

can be learned about groups and individuals from such techniques to helpful classroom practice Professor Bob Burden School of Education and Lifelong Learning University of Exeter Gavin Reid is that rare professional who not only explains how and why children learn best but also suggests a myriad of practical strategies to help them I highly recommend this book for everyone from undergraduates to old hands working toward successful inclusion Parents too will profit from Dr Reid s wise and comprehensive experience Jane M Healy Ph D Educational Psychologist and Author of Your Child s Growing Mind Brain Development and Learning from Birth to Adolescence 3rd Edition NY Broadway Books 2004 Drawing on his considerable experience as a teacher educational psychologist lecturer and author Gavin Reid illustrates how to assess pupils different learning styles and how to vary your teaching style to appeal to all types of learners including disaffected students and those with special educational needs This book provides an overview of the different stages in the learning cycle describes the differences between learners and emphasizes the role the classroom environment and different teaching styles play in children s ability to learn Readers will see how an understanding of learning styles can be used to encourage and promote good inclusive practice Ideas for assessment of learning styles and examples of different teaching styles will prove invaluable to class teachers trainee teachers SENCOs LEA advisers NQTs and NQT advisers and school management

Raise a Smarter Child by Kindergarten David Perlmutter, M.D., Carol Colman, 2008-03-11 Nature didn't finish your child's brain at birth. It's up to you to maximize your child's mental skills without causing additional stress. Acclaimed neurologist and bestselling author of *Grain Brain*, David Perlmutter MD offers these valuable tools: Simple games to reinforce memory pathways in the brain; Information on common household products and children's toys that contain brain-damaging neurotoxins; The right foods and supplements to boost intelligence and turn on your child's smart genes; How to turn the television, the computer, and video games into educational tools; Proven ways to reduce the risk of your child developing ADD and ADHD; Between birth and age five, your child has up to thirty IQ points at stake. Scientists now know that the human brain is undergoing a constant and dramatic transformation in the first years of life. During this peak time of development, every activity and experience leaves an indelible mark on your baby's brain, for better or worse. The right kind of stimulation and nutrition will create connections in the brain that promote intelligence and raise IQ. The wrong kinds of activities and foods can stifle intellectual development, destroy brain cells, and leave your child more vulnerable to learning or behavior problems down the road. So what can you do during the first five years to ensure that your child is primed to excel? The good news is that raising a smarter child is easier than you think. It doesn't require making an investment in expensive equipment or high-priced tutors. It's as simple as playing the right games, serving the right foods, and maintaining a brain-enhancing environment in your home by eliminating common household toxins. In *Raise a Smarter Child by Kindergarten* by Dr. David Perlmutter, you'll learn easy and highly effective strategies that can vastly improve your child's brain power and reduce his or her chances of developing ADD and ADHD. For example, you can stimulate memory by changing a component on the over-the-crib mobile every week, making the baby compare what was there before to what's there now, reinforcing memory pathways in the brain that are critical for learning. Spread out those shots. Schedule more frequent trips to the pediatrician for vaccinations so that fewer shots are administered at once. Flooding the immune system with a cocktail of different vaccines can damage the nervous system. Get rid of toxins. Protecting a child from neurotoxins found in foods, toys, and even baby bottles can help preserve precious IQ points. Inside, Dr. Perlmutter provides a scientifically backed food and supplement plan for children and nursing mothers and details the many brain-building activities that you can do with your child. In addition, he reveals the numerous toys and household products that contain harmful brain-damaging toxins and shows how to identify and combat common childhood problems like ADD and food allergies that may affect your child's development. Your job over the first five years is to help your child build the best brain possible. With Dr. Perlmutter's help, you can mine the countless opportunities you have each day to make your child smarter, happier, and better prepared to excel.
