Site Specific Sound Brandon LaBelle, 2004 Documents a series of sound installations from 1998-2002 by Brandon LaBelle Includes interview with Achim Wollscheid [Acoustic Territories](#) Brandon LaBelle, 2010-04-01 [Acoustic Territories](#) Sound Culture and Everyday Life offers an expansive reading of auditory life It provides a careful consideration of the performative dynamics inherent to sound culture and acts of listening and discusses how auditory studies may illuminate understandings of contemporary society Combining research on urbanism popular culture and auditory issues [Acoustic Territories](#) opens up multiple perspectives it challenges debates surrounding noise pollution and charts an acoustic politics of space by unfolding auditory experience as located within larger cultural histories and related ideologies Brandon LaBelle traces auditory life through a topographic structure beginning with underground territories through to the home as a site and then further to streets and neighborhoods and finally to the sky itself This structure follows sound as it appears in specific auditory designs as it is mobilized within various cultural projects and queries how it comes to circulate through everyday life as a medium for social transformation [Acoustic Territories](#) uncovers the embedded tensions and potentiality inherent to sound as it exists in the everyday spaces around us **MicroBionic: Radical Electronic Music and Sound**

Art in the 21st Century Thomas Bey William Bailey, 2012-12-10 [Micro Bionic](#) is an exciting survey of electronic music and sound art from cultural critic and mixed media artist Thomas Bey William Bailey This superior revised edition includes all of the original supplements neglected by the publishers of the first edition including a full index bibliography additional notes commentary and an updated discography As the title suggests the unifying theme of the book is that of musicians and sound artists taking bold leaps forward in spite of or sometimes because of their financial technological and social restrictions Some symptoms of this condition include the gigantic discography amassed by the one man project Merzbow the drama of silence enacted by onkyo and New Berlin Minimalism the annihilating noise transmitted from the humble laptop computers of Russell Haswell and Peter Rehberg and much more besides Although the journey begins in the Industrial 1980s in order to trace how the innovations of that period have gained greater currency in the present it surveys a wide array of artists breaking ground in the 21st century with radical attitudes and techniques A healthy amount of global travel and concentrated listening have combined to make this a sophisticated yet accessible document unafraid to explore both the transgressive extremes of this culture and the more deftly concealed interstices thereof Part historical document part survival manual for the marginalized electronic musician part sociological investigation [Micro Bionic](#) is a number of different things and as such will likely generate a variety of reactions from inspiration to offense Numerous exclusive interviews with leading lights of the field were also conducted for this book William Bennett Whitehouse Peter Christopherson r i p Throbbing Gristle Coil Peter Rehberg John Duncan Francisco Lopez Carl Michael von Hausswolff Bob Ostertag Zbigniew Karkowski and many others weigh in with a diversity of thoughts and opinions that underscore the incredible diversity to be

found within new electronic music itself **Christof Migone--sound Voice Perform** Christof Migone, Martin Spinelli, 2005

on our spatial experience sometimes even more so than architecture itself This book explores the acoustic atmospheres of diverse architectural environments in terms of scale program location or historic period providing an overview of how acoustic atmospheres are created perceived experienced and visualized The contributors explore how sound and its atmospheres transform architecture and space Their essays demonstrate that sound is a tangible element in the design and staging of atmospheres and that it should become a central part of the spatial explorations of architects designers and urban planners The Sound of Architecture will be of interest to architectural historians theorists students and practicing architects who will discover how acoustic atmospheres can be created without complex and specialized engineering It will also be of value to scholars working in the field of history of emotions as it offers evocative descriptions of acoustic atmospheres from diverse cultures and time periods
