Wood, 2012-10 When I started researching the Blizzard of 77 I was not aware of its magnitude or the area it encompassed nor did I realize the impact it had on the thousands of people it affected many three and four generation farmers and ranchers along with complete towns that could never quite recover from the total devastation Not one time when I would ask for archival records from newspapers or libraries did I not find anyone that had not remembered the blizzard some were only seven but have vivid memories and a story Stories came from coffee shops in the smaller towns and spread by word of mouth of my desire to hear their story I chose only forty six stories to print from the over two hundred interviews but used references from most all Twenty four human lives lost three of which were school children let off their bus at a home never to go back to school again A family froze to death except for one small child found wrapped in his mothers blouse with her frozen body covering him and several other actual stories as told by the rescue personnel involved in their discovery The Livestock losses were so extensive that to this day there has never been an actual loss record What is known is that it had to be in the tens of thousands One rancher never accounted for over ten thousand head lost A lake where so many walked out on the ice and fell through that it was impossible to even estimate and the person that witnessed it Thousands of sheep hogs chickens and even some domestic quail became victims of this three day plains blizzard with recorded winds of ninety eight miles per hour An estimated seven thousand power poles and

thousands of miles of their lines tangled or dangling from their broken polls leaving many without commercial power for six to seven weeks Phone systems in the entire five state area none existent leaving communication only by Police State Patrol Sheriffs department and CB radio to handle the thousands of emergencies and distress calls You will read personal accounts many never told to the public some so traumatic it will be hard to believe Reported human and livestock deaths and what the papers wouldn't or couldn't report Don't expect any sugar coating of the accounts printed they are what they were Don't expect another storm story You will learn about survival skills needed in many emergencies and how to prepare for electrical outages that seem to occur on a regular basis in this country You will learn what not to look at that was lost during a storm but look at what you have that will make getting through the disaster possible and in many cases tolerable Many deaths and sicknesses are caused by not being prepared for a disaster that seem to occur on a regular basis Throughout this story you will learn of some very inexpensive items to have on hand if a disaster occurs This is also a story that had a great impact on the beginning of the farm crises of the 1980s and how it contributed to the farming ranching food shortages and prices of today This alone took a lot of research to get some facts that will undoubtedly make one give serious thought to our very essence of life eating One review said it best This is a book that needed to be written It amplifies the complacency many of us have as to electric power communications heat water sewage disposal food and just our dependency on the modern way of life that could and as demonstrated recently by Mother Nature's fury can end in very little time *Blizzards* Michael Woods, Mary B. Woods, 2007-12-15 Discusses the natural phenomenon of blizzards including possible causes famous incidents around the world with traumatic results and the types of assistance people used to help others directly impacted by this type of disaster **Blitzed by a Blizzard!** Joyce Markovics, 2010-01-01 On December 29 2007 a fierce blizzard hit Olympia National Park in Washington State Cross country skier Randy Kraxberger traveling alone was caught by himself in the severe winter storm Park rangers knew they had to save the lost skier Could their daring rescue effort succeed through blinding snow high winds freezing temperatures and the threat of avalanches Eyewitness accounts and incredible photos bring to life the experiences of ordinary people who faced catastrophic danger and lived to tell their stories Kids will discover the causes and characteristics of blizzards and learn about scientific advances in storm prediction Safety tips show young readers how to stay out of harm's way during a blizzard **Blasted by Blizzards** Jill Keppeler, 2017-12-15 A blizzard is much more than just a bad snowstorm In fact there doesn't even need to be that much snow for a storm to be considered a blizzard This book explores what blizzards are how they're predicted and why they're so dangerous Safety tips and survival skills are discussed throughout with a focus on important early elementary STEM topics from the Next Generation Science Standards Age appropriate text and full color images keep students engaged as they read about this amazing earth science topic *Blizzard* Christopher Lampton, 1992-01-01 **Blizzards** Cari Meister, 1998-12-01 Discusses the nature causes and dangers of blizzards blizzards of the past and ways to survive them *The Children's Blizzard* David Laskin, 2004 The

gripping story of an epic prairie snowstorm that killed hundreds of newly arrived settlers and cast a shadow on the promise of the American frontier January 12 1888 began as an unseasonably warm morning across Nebraska the Dakotas and Minnesota the weather so mild that children walked to school without coats and gloves But that afternoon without warning the atmosphere suddenly violently changed One moment the air was calm the next the sky exploded in a raging chaos of horizontal snow and hurricane force winds Temperatures plunged as an unprecedented cold front ripped through the center of the continent By Friday morning January 13 some five hundred people lay dead on the drifted prairie many of them children who had perished on their way home from country schools In a few terrifying hours the hopes of the pioneers had been blasted by the bitter realities of their harsh environment Recent immigrants from Germany Norway Denmark and the Ukraine learned that their free homestead was not a paradise but a hard unforgiving place governed by natural forces they neither understood nor controlled With the storm as its dramatic heartbreaking focal point *The Children's Blizzard* captures this pivotal moment in American history by tracing the stories of five families who were forever changed that day Drawing on family interviews and memoirs as well as hundreds of contemporary accounts David Laskin creates an intimate picture of the men women and children who made choices they would regret as long as they lived Here too is a meticulous account of the evolution of the storm and the vain struggle of government forecasters to track its progress The blizzard of January 12 1888 is still remembered on the prairie Children fled that day while their teachers screamed into the relentless roar Husbands staggered into the blinding wind in search of wives Fathers collapsed while trying to drag their children to safety In telling the story of this meteorological catastrophe the deadliest blizzard ever to hit the prairie states David Laskin has produced a masterful portrait of a tragic crucible in the settlement of the American heartland *Blizzard (PB)* Christopher Lampton,1991-10 *Operation Snowbound* David W. Mills,2018 The blizzards that devastated the West eventually ended when every farmer and rancher in need of bulldozer crews had received the required assistance Life began to return to normal for the people who experienced the extreme hardships evident throughout that infamous winter but the effects remained in the consciousness of the leaders who had to react to those challenges One reason the blizzards of 1949 devastated the West was because state and federal governments had no methodical approach to deal with natural disasters They could not offer an organized response to national emergencies in which local county and state governments required assistance to save livestock and human residents After these blizzards authorities began to implement changes to disaster response and fundamental changes appeared in the following decades Citizens soldiers and federal contractors worked to end the ordeal of the blizzards quickly opening routes throughout the region State and federal road crews liberated many farmers and ranchers who quickly went to grocery stores for the first time in weeks or months to restock their food shelves Newspapers across the country reported when portions of the affected states were finally free to leave their isolated homes The folks who witnessed the blizzards of 1949 still remember them and newspapers routinely commemorate the event on

relevant anniversaries In the end however the importance of the blizzard conditions as examined here are not the misery they inflicted on the populace not the stories of heroism or heartbreak but the snapshot in time the affair provides the reader today
