 provides a group of countries with economic adjustment programs discusses the design of these programs for their own

 paper is divided into five further sections Section II collects certain ideas about the definition of the adjustment and about

 programs and the possible need for a more explicit political analysis to support the design and implementation of these
   
 programs Section IV examines the key question of the sustainability of adjustment programs in terms of several major
   
 influences on this including the internal consistency or otherwise of domestic policies Section V relates this question of the
   
 sustainability of programs to the constraints coming from the world economic environment Finally section VI highlights some

 international debt crisis that erupted in 1982 threatened the world financial system and turned the 1980s into a lost decade

 early 1990s inflation was lower growth was reviving the major debtors had reached Brady Plan workout agreements reducing
   
 bank debt in exchange for collateral and capital was entering the region in unprecedented magnitudes This study tries to
   
 make sense of this historic financial episode and to derive lessons for future policy Cline first returns to his 1983 projection
   
 models that figured importantly in the debate at that time and reruns them with the benefit of hindsight to see what went
   
 wrong e.g capital flight and what went right e.g revival of industrial country growth He provides a critical survey of the
   
 voluminous economics literature that emerged from the debt crisis The study evaluates performance of the evolving
   
 international debt strategy which eventually succeeded brilliantly in preserving international financial stability and restoring

debtor access to credit markets but failed to achieve debtor country growth in the 1980s The study reviews policy reform and Brady plan results for major Latin American countries provides new analysis of today s debt problems in Russia and Africa and analyzes the degree of vulnerability of Latin Americas capital market renaissance to such factors as overvalued exchange rates and a resurgence of US interest rates It concludes with suggestions for institutional change and policy guidelines to help avoid future crises
