Decision Economics: Minds, Machines, and their Society Edgardo Bucciarelli, Shu-Heng Chen, Juan M. Corchado, Javier Parra D., 2021-08-16 This book is the result of a multi year research project led and sponsored by the University of Chieti Pescara National Chengchi University University of Salamanca and Osaka University It is the fifth volume to emerge from that international project held under the aegis of the United Nations Academic Impact in 2020 All the essays in this volume were virtually discussed at the University of L Aquila as the venue of the 2nd International Conference on Decision Economics a three day global gathering of approximately one hundred scholars and practitioners and were subjected to thorough peer review by leading experts in the field The essays reflect the extent diversity and richness of several research areas both normative and descriptive and are an invaluable resource for graduate level and PhD students academics researchers policymakers and other professionals especially in the social and cognitive sciences Given its interdisciplinary scope the book subsequently delivers new approaches on how to contribute to the future of economics providing alternative explanations for various socio economic issues such as computable humanities cognitive behavioural and experimental perspectives in economics data analysis and machine learning as well as research areas at the intersection of computer science artificial intelligence mathematics and statistics agent based modelling and the related The editors are grateful to the scientific committee for its continuous support throughout the research project as well as to the many participants for their insightful comments and always probing questions In any case the collaboration involved in the project extends far beyond the group of authors published in this volume and is reflected in the quality of the essays published over the years

Decision Economics, In Commemoration of the Birth Centennial of Herbert A. Simon 1916-2016 (Nobel Prize in Economics 1978) Edgardo Bucciarelli, Marcello Silvestri, Sara Rodríguez González, 2016-05-26 The special session Decision Economics DECON 2016 is a scientific forum by which to share ideas projects researches results models and experiences associated with the complexity of behavioral decision processes aiming at explaining socio economic phenomena DECON 2016 held in the University of Seville Spain as part of the 13th International Conference on Distributed Computing and Artificial Intelligence DCAI 2016 In the tradition of Herbert A Simon s interdisciplinary legacy this book dedicates itself to the interdisciplinary study of decision making in the recognition that relevant decision making takes place in a range of critical subject areas and research fields including economics finance information systems small and international business management operations and production Decision making issues are of crucial importance in economics Not surprisingly the study of decision making has received a growing empirical research efforts in the applied economic literature over the last sixty years The recognition of the

oversimplification and limitations of subjective expected utility theory has produced an extraordinary volume of empirical research aimed at discovering how economic agents cope with complexity In the centenary of his birth the international scientific community acknowledges Herbert A Simon's research endeavors aimed to understand the processes involved in economic decision making and their implications for the advancement of economic studies Within the field of decision making Simon's rejection of standard decision making models of neoclassical economics inspired social scientists worldwide to develop research programs in order to study decision making empirically The main achievements regarded decision making for individual firms markets governments and institutions There are many scholars in the world that claim that Herbert A Simon has precipitated something like a revolution in microeconomics focused on the concept of decision making Among these scholars are the Editors of this book who believe that very few scientists produce seminal work in more than one field Herbert A Simon was one of them that caliber of genius

Decision Economics: In the Tradition of Herbert A. Simon's Heritage Edgardo Bucciarelli, Shu-Heng Chen, Juan M. Corchado, 2017-06-13 The special session on Decision Economics DECON is a scientific forum held annually and intended to share ideas projects research results models and experiences associated with the complexity of behavioural decision processes and socio economic phenomena DECON 2017 was held at the Polytechnic of Porto ISEP Portugal as part of the 14th International Conference on Distributed Computing and Artificial Intelligence For the second consecutive year the Editors of this book have drawn inspiration from Herbert A Simon's immense body of work and argue that Simon precipitated something akin to a revolution in microeconomics focused on the concept of decision making Further it is worth noting that the recognition of relevant decision making takes place in a range of critical subject areas and research fields including economics finance information systems small and international business management operations and production Therefore decision making issues are of fundamental importance in all branches of economics addressed both deductively and inductively Not surprisingly the study of decision making has seen growing empirical research efforts in the economic literature over the last sixty years and more recently a variety of insightful cutting edge experimental behavioural and computational approaches Additionally the awareness regarding generalizations and reductions to express economic concepts has led on the one hand to an increasing risk of spreading the language of mathematics as a rhetorical tool and on the other hand to an oversimplification and overlooking of some crucial details especially when it comes to human decisions and hence economic behaviour That awareness however has helped to produce an extraordinary volume of empirical research aimed at discovering how economic agents cope with complex decisions In this sense the international scientific community acknowledges Herbert A Simon's research endeavours to understand the processes involved in economic decision making and their implications for the advancement of economic professions Within the field of decision making indeed Simon's rejection of the standard decision making models used in neoclassical economics inspired social scientists worldwide to develop research programmes in order to study decision making empirically The main
