## **Decision Making Models And Algorithms A First Course:**

Decision Making, Models and Algorithms Saul I. Gass, 1985      Decision Making, Models and Algorithms Saul I. Gass, 1985-05-10 The first book to integrate the decision making process through mathematical modelling Using the concept of a decision framework the ideas of decision making models and algorithms are introduced to the reader by way of realistic and entertaining problems The structure form illustrations problems and challenges in this book provide a unique presentation of the subject matter      Encyclopedia of Decision Making and Decision Support Technologies Adam, Frederic, Humphreys, Patrick, 2008-04-30 As effective organizational decision making is a major factor in a company's success a comprehensive account of current available research on the core concepts of the decision support agenda is in high demand by academicians and professionals Through 110 authoritative contributions by over 160 of the world's leading experts the Encyclopedia of Decision Making and Decision Support Technologies presents a critical mass of research on the most up to date research on human and computer support of managerial decision making including discussion on support of operational tactical and strategic decisions human vs computer system support structure individual and group decision making and multi criteria decision making      **Creative Decision Making** Joe Johnson, 1995-06-01 This title looks at the nature of problems and decisions recognising defining and analysing the problem as well as classifying problems as operational tactical or strategic Being able to recognise relative urgency and importance developing valid options and finding the best solution      **Perspectives in Operations Research** Frank B. Alt, Michael C. Fu, Bruce L. Golden, 2006-12-26 A Symposium was held on February 25 2006 in honor of the 80th birthday of Saul I Gass and his major contributions to the field of operations research over 50 years This volume includes articles from each of the Symposium speakers plus 16 other articles from friends colleagues and former students Each contributor offers a forward looking perspective on the future development of the field      Profiles in Operations Research Arjang A. Assad, Saul I. Gass, 2011-06-28 Profiles in Operations Research Pioneers and Innovators recounts the development of the field of Operations Research OR the science of decision making The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations Over the past six decades OR analyses have impacted our daily lives when making an airline or hotel reservation waiting in line at a bank getting the correctly blended fuel at the gas station and ensuring that the book you are holding arrived at its destination on time OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft During World War II similar applied research groups were formed to study test and evaluate military operations on both sides of the Atlantic Their work resulted in great improvements OR helped the Allies win the war The scientific field that emerged from these studies was called operational research in the U K and operations research in the U S Today OR provides a broad and powerful science to aid decision making Profiles

describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals with varying backgrounds and diverse interests were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines.

The Editors Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York; Saul I. Gass is Professor Emeritus, Department of Decision Operations, Information Technologies, Smith School of Business, University of Maryland, College Park.

From the Reviews: Profiles in Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings, U.K. OR Society's e journal Inside OR, Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise the pioneers of OR for many years to come.
