Touching Architecture Anthony Brand,2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations

and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such *Touching Architecture* will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception *Portable Architecture and Unpredictable Surroundings* Pilar Echavarria M.,2004 From the foldable home to the blow up inhabitable spaces a daring spiritervades each project in this collection of creative solutions in mobilerchitecture All projects are illustrated with colour photographs with accompanying floor plans and information provided by the architects and designers *Architecture* ,2001 **The Practice of Narrative: Storytelling in a Global Context** Michael Heitkemper-Yates,2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 Story can have a power and presence that stretches beyond the vast unspeakable boundaries of time and space and yet story can also have a delicate impermanence that lasts no longer than a moment before it flashes back into the void Some stories can bring people together other stories can tear entire civilisations apart Stories express and enliven experience stories project and describe the desires and anxieties of existence Stories can be narrated through written word and physical gesture through graphic illustration and musical orchestration through the spatial dynamics of architecture and the abstract poetics of conjecture For these and myriad other reasons storytelling and narrative are central to humanity and the study of these practices is central to an understanding of what it means to be human In this volume the many narrative dimensions media and critical approaches to storytelling are explored with the common intention of comprehending and appreciating the global role that story plays in the articulation of human experience **In/visible** FRAC Lorraine,2006 Edited by Beatrice Josse Text by Beatrice Josse Will Bradley Giovanni Carmine Aneta Szyrak **A Prior** ,2006 **Cahiers du Musée national d'art moderne** Musée national d'art moderne (France),2008 *Influences* Anna Gerber,Anja Lutz,2006 **Architecture Tomorrow** Francis Rambert,2005 What will tomorrow s city be made of What shape will the modern landscape take This text offers an overview of trends and options for the future via themes including sculpting space dynamic itineraries and creating hybrids **The Architectural Index** Ervin J.
