Deep Ecology For The Twenty First Century:

Deep Ecology for the Twenty-First Century George Sessions, 1995-01-24 Instead of thinking of nature as a resource to be used for human needs deep ecology argues that the true value of nature is intrinsic This comprehensive and wide ranging anthology contains almost 50 articles by the leading writers and thinkers in the field offering a broad array of perspectives on this important approach to environmentalism

Deep Ecology For The Twenty-first Century George Sessions, 1995-01-01 Discusses the fundamental relationship between human beings and nature and suggests an ethical and philosophical foundation for environmental protection in the next hundred years

Environmentalism David Peterson Del Mar, 2014-05-22 Environmental movements have produced some impressive results including cleaner air and the preservation of selected species and places But movements that challenged western prosperity and comfort seldom made much progress and many radical environmentalists have been unabashed utopianists In this short guide Peterson del Mar untangles this paradox by showing how prosperity is essential to environmentalism Industrialisation made conservation sensible but also drove people to look for meaning in nature even as they consumed its products more relentlessly Hence Englandled the way in both manufacturing and preserving its countryside and the United Statescreated a matchless set of national parks as it became the world s pre eminent economic and military power Environmentalismconsiders both the conservation and preservation movements and less organized forms of nature loving from seaside vacations to ecotourism to argue that these activities have commonly distracted us from the hard work of creating a sustainable and sensible relationship with the environment

Agency, Health And Social Survival Caroline New, 2015-01-28 This text addresses the interface of sociology and psychology which it argues is the key to political change Offering a comparison of a range of psychotherapeutic theories of human nature including those of Freud and Anna Freud Klein and Kleinians and Lacan humanistic psychology and feminist trans cultural and other radical psychotherapies the book focuses on each theory s psychological concept of health and its political implications

Main Currents in Western Environmental Thought P. R. Hay, 2002 Topics covered include the roots of environmental philosophy the development of ecophilosophy deep ecology and ecofeminism how religion relates to environmental values environmentalists writings on science and epistemology animal liberation the role of place the economic dimensions of environmental thought environmental writing in various political traditions and green writers critiques of political movements The work draws from the disciplines of philosophy political science psychology sociology and cultural studies

Environmental Problem-Solving: Balancing Science and Politics Using Consensus Building Tools Lawrence Susskind, Bruno Verdini, Jessica Gordon, Yasmin Zaerpoor, 2020-10-31 Environmental Problem Solving presents short excerpts from carefully selected readings expert commentaries on those readings assignments and the best MIT student responses to the assignments and exam questions with excellent student response The book presents four main models of environmental policy making competing theories of environmental ethics tools for environmental assessment and

environmental decision making and techniques for public engagement and group decision making The book covers the material presented in the semester long course required of all students enrolled in MIT's Environmental Policy and Planning Specialization

Measuring and Evaluating Sustainability Sarah E. Fredericks, 2013-08-15 The indexes used by local national and international governments to monitor progress toward sustainability do not adequately align with their ethical priorities and have a limited ability to monitor and promote sustainability This book gives a theoretical and practical demonstration of how ethics and technical considerations can aid the development of sustainability indexes to overcome this division in the literature and aid sustainability initiatives *Measuring and Evaluating Sustainability* develops and illustrates methods of linking technical and normative concerns during the development of sustainability indexes Specifically guidelines for index development are combined with a pragmatic theory of ethics that enables ethical collaboration among people of diverse ethical systems Using the resulting method of index development the book takes a unique applied turn as it ethically evaluates multiple sustainability indexes developed and used by the European Commission researchers and local communities and suggests ways to improve the indexes The book emphasizes justice as it is the most prevalent ethical principle in the sustainability literature and most neglected in index development In addition to the ethical principles common to international sustainability initiatives the book also employs a variety of religious and philosophical traditions to ensure that the ethical evaluations performed in the text align with the ideals of the communities using the indexes and foster cross cultural ethical dialogue This volume is an invaluable resource for students researchers and professionals working on sustainability indicators and sustainability policy making as well as interdisciplinary areas including environmental ethics environmental philosophy environmental or social justice ecological economics businesses sustainability programs international development and environmental policy making

Tensional Landscapes Gary Backhaus, John Murungi, 2003-01-01 The contributors to this volume address global regional and local landscapes cosmopolitan and indigenous cultures and human and more than human ecology as they work to reveal place specific tensional dynamics Essays discuss Kant's theory of cosmopolitanism versus Hegel's philosophy of geographical determinism the tension of cosmopolitanism versus a closer embeddedness in place scapes geographical determinism in the colonial practices of Colombia and in the current political rhetoric surrounding the revival of Saxony preservational policies in Norway regulation of gated communities in the United States and the hermeneutics of Ground Zero This unusual book which covers such a wide ranging array of topics coheres into a work that will be a valuable reference for scholars of geography and the philosophy of place

The Selected Works of Arne Naess: The pluralist and possibilist aspect of the scientific enterprise Arne Næss, 2005

A Companion to Environmental Thought Peter Hay, 2002 *A Companion to Environmental Thought* sets out to introduce the many strands of thought within the western environment movement It provides a comprehensive overview of the complex and endlessly transforming state of western environmentalism surveying the main strands of thought from the

fields of politics philosophy religion and economics Peter Hay presents the major issues debated in these fields by environmentalists and also by their opponents Each chapter covers the main strands of thought in detail and also includes the seminal contributions from any sub strands Each chapter concludes with a section considering the problems that face the particular line of thought presented With its broad ranging coverage this book is likely to become a core textbook on all environment related courses
