Activation Functions

Activation functions are responsible for deciding which information must be passed to the next layer. They introduce complexity & help the network learn from data.

Living Your Magic Robert Anthony,2019-09-03 Living Your Magic lays out how life when people really look at it is like a magic trick A magic trick works because of illusion and misdirection And with all sorts of tricks of the mind human thinking and perception works just like a magic trick When people don t understand how the trick is done they get fooled every time In Living Your Magic Dr Robert Anthony teaches readers how to look at their life before the trick or the illusions happens and how to never be fooled again Rather than following the same flawed premise behind almost every self help therapeutic or personal development methodology that projects people having a separate self that needs fixing Living Your Magic sees that self as an illusion The problem is that most people don t recognize it as an illusion and believe they must change or improve their self before they can be happy and live a magical life Dr Anthony reveals that everyone has an Inner Creative Genius that allows them to live a magical life if people would only learn to trust it and get out of their own way In that way life becomes easier by giving people less to think about less to remember and less to do so they can truly enjoy their mind and enjoy their life
