Nagel,1989-09-26 The use of microcomputers as decision aids in law practice is increasing rapidly Nagel here shows how developments in software over the last few years are making microcomputers practically indispensable to lawyers as decision aids This is in contrast to his earlier book on Microcomputers as Decision Aids in Law Practice It dealt speculatively with ways in which decision aiding software could be used by lawyers for judicial prediction litigation strategy allocating scarce resources and negotiation mediation The book is divided into three parts covering general developments specific lawyer skills and application to all fields of law The first part previews various uses of decision aiding software by practicing lawyers including a general discussion of the potential and actual benefits of such software How decision aiding software enhances specific lawyer skills comprises the second and largest part of the work Among the topics discussed are computer aided counseling computer aided mediation legal policy evaluation and computer aided advocacy law prediction and legal administration In the third part Nagel assesses applications of decision aiding software to all fields of law with an emphasis on contracts property torts family law criminal law constitutional law economic regulation international law civil procedure and criminal procedure In a provocative concluding chapter he deals with the thorny issues of individual ethics and professional responsibility in the context of microcomputers Because decision aiding software encourages decision makers to be much more explicit about their goals than they otherwise would be its use raises questions as to whose goals should be pursued and to what degree This is a nuts and bolts guidebook that will be a valuable tool for practicing attorneys with some knowledge of microcomputers and is recommended reading for legal scholars and law students

Computer-Aided Judicial Analysis Stuart S. Nagel,1992-10-23 Decision aiding software the underpinning of computer aided judicial analysis can facilitate the prediction of how cases are likely to be decided prescribe decisions that should be reached in such cases and help administrate more efficiently the court process It can do so says Nagel by listing past cases on each row of a spreadsheet matrix by listing predictive criteria in the columns and in general by showing for each factual element the estimated probability of winning a case The software aggregates the information available and deduces likely outcomes But it can also prescribe judicial decisions by listing alternatives in the rows the goals to be achieved in the

columns and by showing relations between alternatives in the cells By similar means decision aiding software can also help perform administrative tasks such as rationally assigning judges or other personnel to cases and by sequencing cases to reduce the time consumed by each case In Part I Nagel provides an overview of computer aided analysis and the role of decision aiding software in the legal process In the second part he deals with judicial prediction from prior cases and from present facts and in the third part he emphasizes the prescribing role of judges particularly in deciding the rules that ought to be applied in civil and criminal procedures Nagel also covers computer aided mediation and provides a new perspective on judicial decisions Then in Part IV he treats at length the process of judicial administration and how to improve its efficiency Of particular interest to court personnel will be the benefits to be derived from reducing delays and in the docketing and sequencing of cases
