Decision and Interaction in Crisis Ben Mor, 1993-07-30 This book provides an analysis of strategic behavior in international crises. A new approach is used to narrow the gap between psychological and game theoretical studies of crisis. Includes an in-depth case study of the 1967 Middle East crisis.

Universal Access in Human-Computer Interaction. Ambient Interaction Constantine Stephanidis, 2007-08-24 This is the second of a three-volume set that constitutes the refereed proceedings of the 4th International Conference on Universal Access in Human-Computer Interaction UAHCI 2007 held in Beijing, China. Devoted to ambient interaction, it covers intelligent ambients, access to the physical environment, mobility, and transportation, virtual and augmented environments, as well as interaction techniques and devices.

The Paradigm of Social Interaction Nikolai Genov, 2021-11-25 The monograph *The Paradigm of Social Interaction* presents a paradigmatic synthesis in sociology. This is a reaction to the growing paradigmatic divisions in the discipline and an attempt at fostering the cumulative development of sociological knowledge. The suggested conceptual fusion includes micro-sociological interaction theories, recent theories of organizational interactions, and the experience from the study on global trends. The intention is to support the building and explanatory application of middle-range theories in all action spheres and at all micro, mezzo, and macro social structural levels. The paradigmatic synthesis is developed around five analytical concepts of the determinants of social interactions: environmental, technological, economic, political, and cultural complexes. Another conceptual framework fostering explanations consists of social actors, relations, and processes as key parameters of the social interaction paradigm. The book also examines the COVID pandemic as a multidimensional crisis, applying the synthetic paradigm as a heuristic tool and knowledge organizing framework. It is used in the studies on social innovations, societal transformations, and global social trends, as well. The book will be of interest to researchers, university teachers, and doctoral and master's students in the fields of sociology, social theory, critical sociology, philosophy of social sciences, innovation, and societal transformation studies.

Supporting Real Time Decision-Making Frada Burstein, Patrick Brézillon, Arkady Zaslavsky, 2010-11-12 This volume of *Annals of Information Systems* will acknowledge the twentieth anniversary of the founding of the International Society for Decision Support Systems (ISDSS) by documenting some of the current best practices in teaching and research and envisioning the next twenty years in the decision support systems field. The volume is intended to complement existing DSS literature by offering an outlet for thoughts and research particularly suited to the theme of describing the next twenty years in the area of decision

support Several subthemes are planned for the volume One subtheme draws on the assessments of internationally known DSS researchers to evaluate where the field has been and what has been accomplished A second subtheme of the volume will be describing the current best practices of DSS research and teaching efforts A third subtheme will be an assessment by top DSS scholars on where the DSS discipline needs to focus in the future The tone of this volume is one of enthusiasm for the potential contributions to come in the area of DSS contributions that must incorporate an understanding of what has been accomplished in the past build on the best practices of today and be integrated into future decision making practices
