Declarative Agent Languages And Technologies:

Declarative Agent Languages and Technologies IV Matteo Baldoni,Ulle Endriss,2006-12-21 This book constitutes the thoroughly refereed post proceedings of the 4th International Workshop on Declarative Agent Languages and Technologies DALT 2006 held in Japan in May 2006 This was an associated event of AAMAS 2006 the main international conference on autonomous agents and multi agent systems The 12 revised full papers presented together with one invited talk and three invited papers were carefully selected for inclusion in the book

Multiagent System Technologies Ralph Bergmann,Gabriela Lindemann,Stefan Kirn,Michal Pechoucek,2008-09-19 For the sixth time the German special interest group on Distributed Artificial Intelligence in cooperation with the Steering Committee of MATES organized the German Conference on Multiagent System Technologies MATES 2008 This conference which took place during September 23 26 2008 in Kaiserslautern followed a series of successful predecessor conferences in Erfurt 2003 2004 and 2006 Koblenz 2005 and Leipzig 2007 MATES 2008 was co located with the 31st German Conference on Artificial Intelligence KI 2008 and was hosted by the University of Kaiserslautern and the German Research Center for Artificial Intelligence DFKI As in recent years MATES 2008 provided a distinguished lively and interdisciplinary forum for researchers users and developers of agent technology to present and discuss the latest advances of research and development in the area of autonomous agents and multiagent systems Accordingly the topics of MATES 2008 covered the whole range from the theory to applications of agent and multiagent technology In all 35 papers were submitted from authors from 11 countries The accepted 16 full papers included in this proceedings volume and presented as talks at the conference were chosen based on a thorough and highly selective review process Each paper was reviewed and discussed by at least three Program Committee members and revised according to their comments We believe that the papers of this volume are a representative snapshot of current research and contribute to both theoretical and applied aspects of autonomous agents and multiagent systems

Multi-Agent Systems Adelinde M. Uhrmacher,Danny Weyns,2018-10-08 Methodological Guidelines for Modeling and Developing MAS Based Simulations The intersection of agents modeling simulation and application domains has been the subject of active research for over two decades Although agents and simulation have been used effectively in a variety of application domains much of the supporting research remains scattered in the literature too often leaving scientists to develop multi agent system MAS models and simulations from scratch Multi Agent Systems Simulation and Applications provides an overdue review of the wide ranging facets of MAS simulation including methodological and application oriented guidelines This comprehensive resource reviews two decades of research in the intersection of MAS simulation and different application domains It provides scientists and developers with disciplined engineering approaches to modeling and developing MAS based simulations After providing an overview of the field's history and its basic principles as well as cataloging the various simulation engines for MAS the book devotes three sections to current and emerging approaches and applications Simulation for MAS explains

simulation support for agent decision making the use of simulation for the design of self organizing systems the role of software architecture in simulating MAS and the use of simulation for studying learning and stigmergic interaction MAS for Simulation discusses an agent based framework for symbiotic simulation the use of country databases and expert systems for agent based modeling of social systems crowd behavior modeling agent based modeling and simulation of adult stem cells and agents for traffic simulation Tools presents a number of representative platforms and tools for MAS and simulation including Jason James II SeSAM and RoboCup Rescue Complete with over 200 figures and formulas this reference book provides the necessary overview of experiences with MAS simulation and the tools needed to exploit simulation in MAS for future research in a vast array of applications including home security computational systems biology and traffic management

Programming Multi-Agent Systems in AgentSpeak using Jason Rafael H. Bordini, Jomi Fred Hübner, Michael Wooldridge, 2007-10-24 Jason is an Open Source interpreter for an extended version of AgentSpeak a logic based agent oriented programming language written in Java™ It enables users to build complex multi agent systems that are capable of operating in environments previously considered too unpredictable for computers to handle Jason is easily customisable and is suitable for the implementation of reactive planning systems according to the Belief Desire Intention BDI architecture Programming Multi Agent Systems in AgentSpeak using Jason provides a brief introduction to multi agent systems and the BDI agent architecture on which AgentSpeak is based The authors explain Jason s AgentSpeak variant and provide a comprehensive practical guide to using Jason to program multi agent systems Some of the examples include diagrams generated using an agent oriented software engineering methodology particularly suited for implementation using BDI based programming languages The authors also give guidance on good programming style with AgentSpeak Programming Multi Agent Systems in AgentSpeak using Jason Describes and explains in detail the AgentSpeak extension interpreted by Jason and shows how to create multi agent systems using the Jason platform Reinforces learning with examples problems and illustrations Includes two case studies which demonstrate the use of Jason in practice Features an accompanying website that provides further learning resources including sample code exercises and slides This essential guide to AgentSpeak and Jason will be invaluable to senior undergraduate and postgraduate students studying multi agent systems The book will also be of interest to software engineers designers developers and programmers interested in multi agent systems
