Providential Democracy Dominique Schnapper,2017-07-05 Democracy posits the universality of the equality principle a community of citizens is governed by the principle of the formal equality of all individuals whatever their real social cultural or other inequalities Democratization on the other hand is motivated by the ambition of ensuring the real equality of citizens and not simply their formal equality The dynamics of democracy are thus insured by the development of a welfare state that increasingly intervenes in order to satisfy the social and economic needs of individuals Especially focused on France yet informed by the experiences of other European countries this book examines the dilemmas of the search for equality in society and politics Democratization guarantees the rights of salaried workers and employees the rights to material survival and housing as well as health care education and culture Today however as Schnapper observes its action has become paradoxical As the fruit of a praiseworthy concern to ensure the universality of rights what Schnapper identifies as a Providence State now aims by means of positive discrimination and other specific promotion policies to defend the particular rights of certain categories of individuals The action of the Providence State thus nourishes an aspiration that the identities of historical collectivities gathered within the same national society be publicly recognized and that these have rights Equity thus supplants equality and multiculturalism universality Such is the ordeal currently experienced by Western democracies which are faced with the increasingly providential nature of their societies Indeed the author asks how can a united political Europe be constructed on the ideals and institutions of citizenship when European nations are becoming providential democracies Providential Democracy offers a searching and timely critique of democratization that will be of interest to sociologists political sci

**Democracies** Bernard Jouve,2019-06-04 Originally published in 2005 Citizen involvement and the concept of partnership in urban governance has long been a major issue in the transformation of local democracy The move from delegated to

participative forms of local government has in principle profound consequences for governance at the scale of cities However it is clear that partnership and participation are interpreted in many different ways according to the traditions of government in different countries This volume brings together the experiences of three countries in which very different approaches to participation are evident Canada France and the United Kingdom By comparing and reflecting on these countries approaches and the resulting changes in governance it provides an in depth analysis of the intentions and effects of involving citizens in policy making It also highlights innovative new forms of partnership which are emerging within metropolitan areas at a local level Revue politique et parlementaire ,1897 Les principes de la découverte Théophile Funck-Brentano,1885
