Deep Ecology:

The Deep Ecology Movement Alan Drengson, Yuichi Inoue, 1995-02-02 Deep ecology a term coined by noted Norwegian philosopher Arne Naess is a worldwide grassroots environmental movement that seeks to redress the shallow and piecemeal approach of technology based ecology Its followers share a profound respect for the earth's interrelated natural systems and a sense of urgency about the need to make profound cultural and social changes in order to respond and sustain the long term health of the planet This comprehensive introduction to the Deep Ecology movement brings together Naess groundbreaking work with essays by environmental thinkers and activists responding to and expanding on its philosophical and practical aspects Contributors include George Sessions Gary Snyder Alan Drengson Dll Devall Freya Matthews Warwick Fox David Rothenberg Michael E Zimmerman Patsy Hallen Dolores LaChapelle Pat Fleming Joanna Macy John Rodman and Andrew McLaughlin The Authors offer diverse viewpoints from ecofeminist scientific and purely philosophical approaches to Christian Buddhist and Gandhian based principles Their essays show how social technological psychological philosophical and institutional issues are all fundamentally related to our attitudes and values toward the natural world

Regarding Nature Andrew McLaughlin, 1993-01-01 McLaughlin philosophy City U of New York argues that industrialism is the cause of our current environmental crisis and that the solution requires a fundamental change in how we understand nature and humanity He reviews the capitalist socialist industrial and scientific views of nature the ideology of control anthropocentrism and other topics Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR

Deep Agroecology and the Homeric Epics John W. Head, 2020-12-15 Drawing on the Homeric epics this multidisciplinary work reveals the cultural transformations which need to take place in order to transition from today's modern extractive agricultural system to a sustainable natural systems agriculture In order to provide an imaginative foundation on which to build such a cultural transformation the author draws on the oldest and most pervasive pair of literary works in the Western canon the Iliad and the Odyssey He uses themes from those foundational literary works to critique the concept of state sovereignty and to explain how innovative federalism structures around the world already show momentum building toward changes in global environmental governance The book proposes a dramatic expansion on those innovations to create eco states responsible for agroecological management Drawing from many years of experience in international institutions the author proposes a system of coordination by which an international agroecology focused organization would simultaneously i avoid the shortcomings of the world's current family of powerful global institutions and ii help create and implement a reformed system of local landscape based agriculture wholly consistent with ecological principles Acknowledging the difficulty of achieving reforms such as these the author suggests that a new cultural conceptual narrative can be constructed drawing on values set forth 2 700 years ago in the Homeric epics He explains how these values can be reimagined to drive forward our efforts in addressing today's the climate and agricultural crises in ways that reflect not reject the natural processes and

relationships that make the Earth a living planet This book will be of great interest to students academics and policymakers addressing issues of agrarian values environmental and agricultural law environmental restoration agroecology and global institutional reform

with contemporary social and cultural theory With an eye to critically exposing unexamined essentialist and foundational commitments the author shows how deep ecology remains profoundly entangled with the very traditions of thought it has sought to overcome The author critically assesses deep ecology s relations with the Enlightenment modernity systems theory anthropocentrism the figure of wilderness and the trope of the primitive and the imagined promise of posthistoric primitivism He demonstrates the manner in which deep ecology and much of contemporary environmental thought has remained blind to the lessons and possibilities of contemporary social and poststructural theory Drawing from an array of contemporary theoretical works including Haraway s figure of the cyborg and situated knowledges Deleuze s conception of an image of thought Foucault s panopticon Trinh on ethnographic authority Lingis on the Other Torgovnick and Clastres s work on the primitive and power and Vattimo s weak thought van Wyck opens a clearing within which the ecological problematic and the question of the human subject may be rethought
