Deep Crises And Reform:

Deep Crises and Reform Michael Bruno, 1996-01-01 This paper was first presented as my address as president to the 1995 Congress of the International Economic Association in Tunis [Learning, Policy Making, and Market Reforms](#)

Covadonga Meseguer Yebra, 2009-03-30 In the 1980s and 1990s market reforms swept the world It is widely believed that the reformist wave can be partly explained in terms of the lessons learned from policy failures of the past Whereas this interpretation of events is well established it has never been empirically proved *Learning and Market Reforms* is the first study that tests the impact of policy learning on economic policy choices across time and space The study supports the popular explanation that on average governments around the world adopted privatization and trade liberalization and sustained open capital accounts as a result of learning from the experience of others [Trump and the Deeper Crisis](#) Kevin Young, Michael Schwartz, Richard Lachmann, 2022-12-12 As far right forces cement their hold on the Republican Party and as the Democratic Party appears unable to stop them what lies ahead The authors argue that confronting Trumpism requires a frontal attack on the conditions that incubated the monster *Crisis, Reform and the Way Forward in Greece* Calliope Spanou, 2021-08-24 This volume discusses different aspects of Greece's political economy during the past decade and reflects on the country's path ahead examining the major question did this challenging period succeed in providing a window of opportunity for deeper institutional and societal change The authors seek to contribute to the discussion of the dynamics of stability and change of the nexus between external pressure and domestic agency Greece offers a most interesting case study as much in analytical as in empirical terms Never before did a euro area member require three macroeconomic adjustment programmes under stringent policy conditionality and external supervision This experience shattered past certainties and reshaped the political landscape A decade later Greece was starting to recover and received international recognition for its reform efforts However the COVID 19 pandemic provided an external shock that risks derailing such achievements The volume includes chapters by academics and researchers from different professional backgrounds history economics public law political science public administration and political economy Their diverse experience and viewpoints contribute to multidimensional analyses in subject areas such as Greece's constitutional structure public sector reforms labour market developments China's expanding investment footprint and product market reforms [The Political Economies of Turkey and Greece](#) Mustafa Kutlay, 2018-08-07 The economic policies of reactive states such as Turkey and Greece both of which have shown limited ability to implement institutional reforms in recent years have paved the way for deep crises The crises are devastating for both societies social fabric but they also open up the opportunity to introduce new economic regimes They do however not always invite changes in dominant paradigms Despite weak state capacity and deep economic crisis in both cases substantial reforms were initiated in Turkey whilst an opposite trend prevailed in Greece Drawing on field research this book develops a political economy framework that explains reform cycles and post crisis outcomes in reactive states

Israel's Crisis and Economic Reform Michael Bruno, 1989 This article analyses the roots of the deep crisis that has afflicted the Israeli economy since 1973 and the attempt at economic reform and recovery since 1985 All of these are discussed against the background of the long term evolution in Israel's structure and growth process At the center of the analysis lie the implications of an oversized government and especially the devastating effects on growth and inflation of the large and persistent public sector deficit on top of the growing tax and public expenditure levels The norm of living beyond one's means at the public sector level has also severely affected the norms of behavior of the private household as well as business sectors Since 1985 there have been signs of recovery originating from the balancing of the budget and the relative stabilization of the currency Labor and capital markets are gradually becoming more flexible and real interest rates are coming down Even so inflation rates are not yet down to international levels continued budget balance is not assured and excessive wage increases have substantially diminished profit rates and investments in the business sector Structural problems rooted in economic mismanagement of the crisis years are surfacing Resumption of a sustained growth process requires persistent budget balance and a substantial additional reduction in public expenditure and tax levels Structural reforms only barely started have to be persistently followed in the labor and capital markets in the fiscal system and in the further opening up of commodity and financial markets to competition from both home and abroad

Urban Innovation Systems Willem van Winden, Erik Braun, Alexander Otgaar, Jan-Jelle Witte, 2014-04-11 Why are some regions and cities so good at attracting talented people creating high level knowledge and producing exciting new ideas and innovations What are the ingredients of success Can innovative cities be created and stimulated or do they just flourish by mere chance This book analyses the development and management of innovation systems in cities in order to provide a better understanding of what makes such systems perform The book opens by developing a conceptual model that combines insights from urban economics with economic geography urban governance and place marketing This highlights the relevance of path dependence different types of proximity and the role of clusters networks and platforms institutional conditions place attractiveness and place identity in the evolution of local innovation systems The authors then draw on this conceptual framework to structure empirical case studies in three cities with a relatively high innovation performance Eindhoven the Netherlands Stockholm Sweden and Suzhou China Through these case studies they provide a detailed analysis of how successful innovation systems evolve and what makes them tick Unique to this book is the linking of analysis to concrete policy and management responses The book ends with a discussion on six themes in the development of successful urban innovation systems firm capabilities and leader firms higher education and research attractive environment place branding institutional environment and entrepreneurship Each theme is examined fully drawing lessons from the case studies and from recent insights and other cases discussed in the literature This title will be of interest to students researchers and policymakers involved in regional innovation systems knowledge locations and cluster development
