Massachusetts at Amherst for sponsoring the workshop and to the National Science Foundation for supporting under grant number MIP 8803418 the keynote address and the distribution of this book to all workshop attendees The objective of the workshop was to bring together researchers and practitioners from both industry and academia in the field of defect tolerance and yield enhancement in VLSI to discuss their mutual interests in defect tolerant architectures and models for integrated circuit defects faults and yield Progress in this area was slowed down by the proprietary nature of yield related data and by the lack of appropriate forums for disseminating such information The goal of this workshop was therefore to provide a forum for a dialogue and exchange of views A follow up workshop in October 1989 with C H Stapper from IBM and V K Jain from the University of South Florida as general co chairmen is being organized *Proceedings, the IEEE*
