## **Asian Money Markets:**

**Asian Money Markets** David Chamberlin Cole, Hal S. Scott, Philip A. Wellons, 1995 Asian Money Markets traces the evolution of money markets in seven key economies of East and Southeast Asia Hong Kong Indonesia Japan Korea Malaysia the Philippines and Singapore It asks how government policy affected the performance of the markets over several decades Several very different approaches emerge with important consequences for financial sector development Countries pursuing market oriented development strategies including those in transition from socialist to market economies need effective financial systems that include efficient money markets This book should dispel the view that a government can quickly develop money markets the most complex markets described here started with new government policies more than twenty years ago and are still evolving to meet new challenges Asian Money Markets will be of interest to scholars of development finance financial officials and advisers and anyone who wants to learn from the experience of some of the most dynamic economies in the world

**The Money Markets of Developing East Asia** Robert F. Emery, 1991 Written for international finance executives economists and policymakers this is the first book to describe in detail the money markets of the eight major developing countries of East Asia Hong Kong Indonesia Korea Malaysia the Philippines Singapore Thailand and Taiwan Robert F Emery makes use of the most recent and complete data available to analyze the strengths and weaknesses of each individual market and identify the main participants the nature of the instruments used the size of the market and any official influences on the market He also assesses each market in terms of its past performance suggests possible measures to improve the market and describes the basic ingredients for establishing a viable and growing market Following an introductory chapter that explains Asian money markets the volume contains chapters on each of the eight countries that analyze their respective markets in detail Each chapter is organized into a standard format making it easy for the reader to locate specific information The introductory section contains information on the country's general economy its financial system the structure of the money market and significant money market developments Subsequent sections examine individual components of the money market such as the interbank or commercial paper market An analytical section discusses how large a role the money market plays in the country's economy evaluates past financial policies and proposes future policy initiatives The final chapter makes cross country comparisons of the various countries markets and indicates what lessons can be derived from the preceding analyses Numerous explanatory tables and figures amplify points made in the text

**Asian Equity Markets**, 2006 Asian equity markets have grown significantly in size since the early 1990s driven by strong international investor inflows growing regional financial integration capital account liberalization and structural improvements to markets The development of equity markets provides a more diversified set of channels for

financial intermediation to support growth thus bolstering medium term financial stability At the same time as highlighted by the May June 2006 market corrections the increasing role of stock markets potentially changes the nature of macroeconomic and financial stability risks as well as the policy requirements for dealing with these risks Asia-Pacific Fixed Income Markets Jonathan A. Batten,Thomas A. Fetherston,2002-02 As stability has begun to return to the Asia Pacific region so do international investors appetites for high yielding Asian securities Right now due to the substantial bank debt accrued during the last financial crisis there the liveliest investment areas in the Asian Pacific region are fixed income instruments Authors Jonathan A Batten and Thomas A Fetherston provide country by country analyses including highly focused descriptions of the history current disposition and future prospects of each country s bond markets along with detailed explanations of the market structure and conventions in each Jonathan Batten is a Professor of Finance at Deakin University His professional experience includes senior posts at the Australian Industry Development Corporation The Bank of Tokyo Credit Lyonnais and IBM Consulting in their Asia Pacific Banking and Finance Group *Asian Business* ,1999 **Asian Finance** ,1991

**Handbook of Asian Sovereign Bond Markets** Mohamed Ariff,Fan Fah Cheng,Shamsher Mohamad,2013 **Asian Forum** ,1973 Financial Markets and Institutions in Singapore Chwee Huat Tan,1996 **Reports from Her Majesty's Diplomatic and Consular Officers Abroad on Subjects of Commercial and General Interest** ,1882 The Herald of Asia ,1921 The Bankers' Magazine, and Journal of the Money Market ,1884 **Bankers' Magazine, Journal of the Money Market and Commercial Digest** ,1882 Asiaweek ,1982 Asian Review ,1914 Beginning in 1895 includes the Proceedings of the East India Association **Liberalization, Growth, and the Asian Financial Crisis** Mohamed Ariff,Ahmed M. Khalid,2000 This timely book examines the effects of financial liberalization in the more advanced economies of Southeast Asia The book also analyses the degree to which emerging and transitional economies in East and South Asia can benefit from this example The weakness of the banking sector is examined in order to explain the reasons behind the currency crisis and to prescribe policies to avoid a similar episode in the future Further the book documents the individual steps taken to liberalize the economies over a period of about 20 30 years in each country The analyses reveal that liberalization led to high growth in economies undertaking such reforms while unwillingness to take such reforms appear to have led to poor growth and hence low social development This finding contradicts the common belief that liberalization led to the financial crisis and then to growth collapse An efficient and liberalized financial sector is an essential precondition for promoting and accelerating economic growth and welfare Arguments supporting this policy are based on the experience of Southeast Asian economies particularly the pioneers such as Malaysia Singapore Indonesia and Thailand This has led some less developed countries in East and South Asia to initiate the process of financial sector reforms and to realize the potential benefits of such reforms The authors analyse the reform process and the lessons to be drawn from the experiences of these economies in their quest for sustained development in East and South Asia
