Multicultural Organizations in Asia Heidi Dahles, Loh Wei Leng, 2014-02-04 A new study of how Asian Pacific organizations and private enterprises are expanding into markets beyond their national bases by transforming themselves in multinational and transnational directions It shows how multicultural relations are fundamental to such shifts It explains the organizational processes that characterize economic restructuring and the transgression of state borders by organizations seeking economic opportunities It shows how these ambitions require boundaries to be overcome both inside and outside of organizations This study also details the trend towards fluidity and complexity of boundaries both physical and symbolic within and without of organizations due to the speeding up of key processes This however does not imply that boundaries are disappearing Organizational change always challenges identities and sets new targets for this very identification Mergers acquisitions and strategic alliances all generate new organizational forms and necessitate the redefinition and renegotiation of organizational boundaries The manifold ways in which organizational boundaries are affected by economic restructuring and at the same time affect social processes within and between organizations in particular in the context of the booming economies of the Asia Pacific area is the focus of this volume This book was previously published as a special issue of the Asian Pacific Business Review

Globalization against Democracy Guoguang Wu, 2017-04-24 Globalization has reconfigured both the external institutional framework and the intrinsic operating mechanisms of capitalism The global triumph of capitalism implies the embracing of the market by the state in all its variants and that global capitalism is not confined to the shell of nation state democracy Guoguang Wu provides a theoretical framework of global capitalism for specialists in political economy political science economics and international relations for graduate and undergraduate courses on globalization capitalism development and democracy as well as for the public who are interested in globalization Wu examines the new institutional features of global capitalism and how they reframe movements of capital labor and consumption He explores how globalization has created a chain of connection in which capital depends on effective authoritarianism while democracy depends on capital Ultimately he argues that the emerging state market nexus has fundamentally shaken the existing institutional systems harming democracy in the process

A Global Law of Diversity

Nicolò Paolo Alessi, 2024-11-25 This book provides a global perspective on the accommodation of diversity within

constitutional traditions considering the most innovative approaches and legal instruments of the Global North and Global South This field of study traditionally dominated by a Global North approach based on majority minority and rights based discourse is undergoing significant development The work thus assesses the appropriateness of the existing mainstream theoretical tools and concepts in particular minority and minority related concepts as well as rights discourse to grasp the ongoing evolution of this field of law A reconsideration of the traditional conceptual categories and the introduction of the concept Law of Diversity is proposed as a theoretical framework to grasp the ongoing developments in this area Among the models studied those that are referred to as emergent models for the accommodation of diversity in the Global North appear to be particularly in need of theoretical recognition To this end the theory of federalism is used to serve a rather unexplored theoretical function Federal theory is put forward as a theoretical instrument to frame and explain the emergent instruments for the accommodation of diversity as well as provide practical solutions for their development The book will be of interest to researchers academics and policy makers working in the areas of comparative constitutional law minority and indigenous rights law and federal studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Human Rights: Universality and Diversity Eva Brems,2021-10-18 Human rights are by definition universal Yet in a world characterized by enormous diversity there is no consensus about the implications of the universality of human rights In several regions of the world human rights conceptions are promoted that challenge the mainstream largely Western dominated discourse on this subject This volume offers an analysis of context specific human rights discourses from East Asia Subsaharan Africa and the Muslim World Rather than interpreting these as threats to universality the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights A theory of inclusive universality is developed and its implications are translated into legal techniques On the one hand there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms On the other hand giving credit to non Western views also implies that there should be room for transformation of those human rights norms
