Aspects of the Computer-based Patient Record Marion J. Ball, M.F. Collen, 1992 The increasing need of patients for better access to good quality care the great mobility of people in this nation and their quest for care from a variety of health care professionals The need for faster and lower cost electronic claims reimbursement processes all have made it very clear that it has become essential that throughout this country the current obsolescent paper based medical records must be replaced as soon as possible by computer based patient records In recognition of this high priority need the Institute of Medicine IOM formed the Committee on Improving the patient record The result was the publication of the computer based patient record An essential technology for health care The support of this IOM project by members of its committee and subcommittees resulted in the preparation of such a large number of worthy supporting papers that it was not possible to include them in the IOM publication Accordingly the IOM authorized the editors of this book to publish separately some papers that fit appropriately into this more technology oriented book

Aspects of the Computer-based Patient Record Harold P. Lehmann, Patricia A. Abbott, Nancy K. Roderer, Adam Rothschild, Steven Mandell, Jorge Ferrer, Robert E. Miller, Marion Ball, 2013-02-14 One of the hottest political issues today concerns ways to improve national healthcare systems without incurring further costs An extensive study by the Institute of Medicine IOM in the United States formally reported that computer based patient records are absolutely necessary to help contain the cost explosion in health care The information obtained from experts the studies conducted and the conclusions that went into the IOM s report have now been collected in Aspects of the Computer Based Patient Record A large portion of the volume discusses the state of the art in existing computer based systems as well as the essential needs which must be addressed by future computer based patients records A final section in the book discusses implementation strategies for changing to the electronic system and practical issues Who will bear the final cost How and when will healthcare providers who use the system be trained This volume contains the concise valuable information which hospital administrators hospital systems designers third party payer groups and medical technology providers will need if they hope to successfully transit to hospital systems which use a computer based patient record

The Computer-Based Patient Record Institute of Medicine, Committee on Improving the Patient Record, 1997-10-14 Most industries have plunged into data automation but health care organizations have lagged in moving patients medical records from paper to computers In its first edition this book presented a blueprint for introducing the computer based patient record CPR The revised edition adds new information to the original book One section describes recent developments including the creation of a computer based patient record institute An international chapter highlights

what is new in this still emerging technology An expert committee explores the potential of machine readable CPRs to improve diagnostic and care decisions provide a database for policymaking and much more addressing these key questions Who uses patient records What technology is available and what further research is necessary to meet users needs What should government medical organizations and others do to make the transition to CPRs The volume also explores such issues as privacy and confidentiality costs the need for training legal barriers to CPRs and other key topics *Aspects of the Computer-based Patient Record* Harold P.
