Survival and Sustainability Hüseyin Gökçekus, Umut Türker, James W. LaMoreaux, 2011-03-23 The International Conference on Environment Survival and Sustainability held at the Near East University Nicosia Northern Cyprus 19-24 February 2007 dealt with environmental threats and proposed solutions at all scales. The 21 themes addressed by the conference fell into four broad categories: Threats to Survival and Sustainability; Technological Advances towards Survival and Sustainability; Activities and Tools for Social Change; Defining Goals for Sustainable Societies. Activities and tools that move the society towards greater sustainability were emphasized at the conference. These included environmental law and ethics, environmental knowledge, technology and information systems, media, environmental awareness, education and lifelong learning, the use of literature for environmental awareness, the green factor in politics, international relations, and environmental organizations. The breadth of the issues addressed at the conference made clear the need for greatly increased interdisciplinary and international collaboration. The survival and sustainability concept. The exchanges at the conference represent a step in this direction. **Actor-Network Theory and Technology Innovation: Advancements and New**

Concepts Tatnall, Arthur, 2010-11-30 Actor Network Theory and Technology Innovation: Advancements and New Concepts provides a comprehensive look at the development of actor network theory itself as well as case studies of its use to assist in the explanation of various socio-technical phenomena. This book includes topics relating to technological innovation, both those using actor network theory as an explanatory framework and those using other approaches. It is an excellent source of information regarding ANT as an approach to technological innovation and its link to ICT (Information Communication Technology). *Engineering and Sustainable Community Development* Juan Lucena, Jen Schneider, Jon A. Leydens, 2022-06-01 This book *Engineering and Sustainable Community Development* presents an overview of engineering as it relates to humanitarian engineering, service learning, engineering for community development, often called sustainable community development (SCD). The topics covered include a history of engineers and development, the problems of using industry-based practices when designing for communities, how engineers can prepare to work with communities and listening in community development. It also includes two case studies: one of engineers developing a windmill for a community in India and a second of an engineer mapping communities in Honduras to empower people to use water effectively and student perspectives and experiences on one curricular model dealing with community development.
