Assessing Health Care Reform:

Assessing Health Care Reform Institute of Medicine, Committee on Assessing Health Care Reform Proposals, 1993-02-01
This book establishes a framework for assessing health care reform proposals and their implementation. It helps clarify objectives, identifies issues to be addressed in proposals, distinguishes between short and long term expectations and achievements, and directs attention to important but sometimes neglected questions about the organization and provision of health care services. In addition, the volume presents a discussion and analysis of issues essential to achieving fundamental goals of health care reform: to maintain and improve health and well being; to make basic health coverage universal and to encourage the efficient use of limited resources. The book is a useful resource for anyone developing or assessing options for reform.

care Technological assessment and cost effective principles have been posited as approaches to reform health care while improving quality of care In this paper the authors assert that outcomes assessment or the measurement of the efficiency of health care systems can complement technology assessment in health care reform They examined claims data on Medicare patients from 1992 2004 who had experienced an acute myocardial infarction AMI or heart attack in order to aggregate individual patient outcomes and costs and derive hospital specific measures of efficiency Key Findings Technology assessment did not fully explain actual mortality or expenditure growth in the hospitals studied Changing incentive structures will be necessary to address the lack of efficiency in the health care system As part of health care reform the establishment of Accountable Care Organizations ACOs at hospitals or in physician groups would enhance efficiency and address increasing costs and gaps in quality As a complement to technology assessment outcomes assessment is a promising approach to health care reform that addresses expenditures cost growth and quality care *Competitive Approaches to Health Care Reform* Richard J.
