Assessing The Accuracy Of Remotely Sensed Data:

Assessing the Accuracy of Remotely Sensed Data Russell G. Congalton, Kass Green, 2008-12-12 Accuracy assessment of maps derived from remotely sensed data has continued to grow since the first edition of this groundbreaking book As a result the much anticipated new edition is significantly expanded and enhanced to reflect growth in the field The new edition features three new chapters including Fuzzy accuracy assessment Positional accuracy *Assessing the Accuracy of Remotely Sensed Data* Russell G. Congalton, Kass Green, 2019-08-08 The past 10 years have brought amazing changes to the technologies used to turn remotely sensed data into maps As a result the principles and practices necessary for assessing the accuracy of those maps have also evolved and matured This third edition of *Assessing the Accuracy of Remotely Sensed Data Principles and Practices* is thoroughly updated and includes five new chapters Now 15 chapters long this text is the only one of its kind to provide geospatial analysts with the requisite considerations tools and theory necessary to conduct successful and efficient map accuracy assessments and map users with the knowledge to fully understand the assessment process to ensure effective use of maps See What's New in the Third Edition All original chapters have been updated to include new standards practices and methodologies A new chapter on planning accuracy assessments A new chapter on assessing maps created using object based technologies Two case study chapters one showcasing the assessment of maps created from traditional methods and one on the assessment of object based maps Emphasis on considering and planning for positional accuracy in concert with thematic accuracy An appendix containing the internationally recognized ASPRS Positional Accuracy Standards A new final chapter summarizing the key concepts considerations and lessons learned by the authors in their decades of implementing and evaluating accuracy assessments **Assessing the Accuracy of Remotely Sensed Data** Russell G. Congalton, Kass Green, 1998-09-17 Because the accuracy of remotely sensed data is critical to any successful mapping project accuracy assessment is an important tool for anyone who uses remote sensing This is a complete guide to assessing the accuracy of maps generated from remotely sensed data and the only book available that is devoted solely to this complex topic *Assessing the Accuracy of Remotely Sensed Data* Russell G. Congalton, Kass Green, 2019 The field of assessing the accuracy of maps derived from remotely sensed data has continued to develop and mature since the first edition of this book in 1999 The third edition will have all chapters reviewed and updated with any new information available today It will include a redo of spatial accuracy chapter to update for new ASPRS standards and better explain the issue with RMSE Another new chapter on AA sampling for objects vs pixels will be included an object based case study and more information on proportional sampling Finally an entire new chapter on collection of reference data for general use and sharing in the public domain will complete the third edition Environmental

Information Management And Analysis W K Michener, J W Brunt, S G Stafford, 1994-08-08 Most environmental studies are based upon data collected at fine spatial scales plots sediments cores etc Furthermore temporal scales of these studies have been relatively short days weeks months and few studies have exceeded three years duration the typical funding cycle Despite this history environmental scientists are now being called upon to extrapolate findings from plot level studies to broader spatial scales and from short term studies to longer temporal scales up to decades for questions related to long term processes such as global warming and the rise in sea level The complex questions being addressed internationally require that scientists take advantage of new technologies including remote sensing geographic information systems GIS and powerful climatic and environmental simulation models As more environmental scientists begin to work at these broader spatial and temporal scales and to utilize many of the newer technologies they are recognising a whole new class of problems This book aims to address the most pertinent issues and includes a comprehensive review of selected topics case studies and theoretical discussions divided into seven sections each preceded by a brief introduction *Remote Sensing and GIS Accuracy Assessment* Ross S. Lunetta, John G. Lyon, 2004-07-27 Based upon a special symposium sponsored by the U S Environmental Protection Agency EPA Remote Sensing and GIS Accuracy Assessment evaluates the important scientific elements related to the performance of accuracy assessments for remotely sensed data GIS data analysis and integration products Scientists from federal state and local governments academia and nongovernmental organizations present technical papers which examine sampling issues reference data collection edge and boundary effects error matrix and fuzzy assessments error budget analysis and change detection accuracy assessment This compilation contains 20 chapters that represent important symposium outcomes *Classification Methods for Remotely Sensed Data, Second Edition* Brandt Tso, Paul Mather, 2009-05-12 Keeping abreast of new developments this new edition provides a comprehensive and up to date review of the entire field of classification methods applied to remotely sensed data It provides seven fully revised chapters and two new chapters covering support vector machines SVM and decision trees Global Land Cover Validation Jun Chen, Xiaohua Tong, Huan Xie, Lijun Chen, Songnian Li, 2025-01-30 This book aims to summarize and report the major research achievements and validation results under the global land cover GLC initiative led by the Group Earth Observation GEO The first part of the book introduces the major tasks and challenges facing the validation of finer resolution GLC maps and presents the concepts and overall framework of the GEO led initiative Chapters 2 5 provide systematic introductions to the major methodology of finer resolution GLC map validation including sampling design reference data collection sample labeling and accuracy assessment Chapter 6 introduces the online validation tools that have been developed including their design considerations and functionalities Chapter 7 presents the international validation practices and the results of validating GlobeLand30 at country regional and global scales Future directions are also discussed in the Conclusion chapter Features Presents complete coverage of land cover validation from concepts methodology and collaborative tools to

applications Details algorithms techniques and methods for land cover validation including sampling judgment and accuracy assessment Reviews some of the software tools that can be used for GLC validation and discusses the issues related to the design usability efficiency and limitations of these tools Highlights case studies of validation at global regional and national scales which can serve as great references for researchers Provides an extensive bibliography covering the whole scope of land cover validation Global Land Cover Validation Methodology Tools and Practices serves as a reference for those engaged in land cover validation especially at a global scale including students professionals researchers and general practitioners It is also an excellent resource for professionals involved in sustainable development monitoring environmental change studies natural resource management disaster assessment and mitigation and many other applications **Remote Sensing**
