**Contemporary Composition Studies** Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

**Assessing Second Language Writing in Academic Contexts** Liz Hamp-Lyons, 1991 This is the first volume to focus on the assessment of second language writing The collection as a whole provides coverage of all issues in second language writing assessment starting from the context in which and for which assessment must occur moving through the aspects of decision making and design in a writing assessment program and then considering how the need to evaluate any program on assessment can be carried out After a discussion of issues of public reporting an area which will receive increasing attention in the next few years the volume closes with a discussion of what new issues and answers the future may bring The book reflects the current belief in direct writing assessment in second language writing assessment While it is often expected that those working with ESL students will focus on language error throughout the book themes of needs attitudes ideas and content dominate For second language writers the use of written language to learn to create knowledge and to share ideas and beliefs are vitally important Additionally issues of cross cultural academic literacy practical information on criteria and scoring models for use with ESL writers and research on the efficacy and effects of various assessment models are provided The book blends theory and practice in a way which offers all those who are concerned with the writing skills of nonnative users of English an invaluable resource
