Retirement and Wealth Alan L. Gustman, Thomas L. Steinmeier, 2001 This paper estimates reduced form retirement and wealth equations and

analyzes the relationship between them Data are from the first four waves of the longitudinal Health and Retirement Study individuals born from 1931 to 1941 Single equation retirement models relate the probability of retiring to forward looking measures of changes in the values of social security and pension benefits when retirement is postponed Such simple models suggest that if the social security early retirement age were to be raised or abolished more people would retire earlier rather than later Our work analyzes the reasons for such counter intuitive predictions and discusses the need to analyze these policies in the context of a structural model of retirement and wealth To improve retirement analysis we develop the premium value a measure of the future value of pensions and social security that better reflects the accrual of benefits under defined contribution plans We also introduce a new definition of retirement to blend information on objective hours worked with subjective self reports of retirement status Our findings also explore the effects of social security incentives on partial retirement and consider the importance of partial retirement in any study relating social security to retirement behavior

Pension and Social Security Wealth in the Health and Retirement Study Alan L. Gustman,1997 Together pensions social security and health insurance account for half of the wealth held by all households in the Health and Retirement Study HRS for 60 percent of total wealth of HRS households who are in the 45th to 55th wealth percentiles and even for 48 percent of wealth for those in the 90th to 95th wealth percentiles The HRS surveys households aged 51 to 61 in 1992 and obtains pension plan descriptions from respondents employers Pension accrual profiles income and wealth distributions by type wealth income ratios and accrued wealth by pension status are also explored Social Security Reform Steven A. Sass,Robert K. Triest,1997 Contains nine essays and 13 discussions on reform of social security and its effect on saving in the United States Discusses defined benefit and contributions plans and individual retirement accounts as methods for retirement saving as well as forms of investment for pension funds Includes a paper on the likely impact of social security reform on labour supply Work Options for Older Americans Teresa Ghilarducci,2007 The book contains eleven articles along with commentary that deal with issues of employment opportunity and constraints for older persons pension types and coverage retirement choices and public policies that promote or hinder either retirement or employment of the elderly Contributors present effective ways to prepare for this unprecedented growth in the number of older workers *The Cumulative Book Index* ,1997 A world list of books in the English language Minutes of the Stated Faculty Meeting Stanford University. School of Education,2000 Trends in Male Labor Force Participation and Retirement Patricia M. Anderson,Alan L. Gustman,Thomas L. Steinmeier,1997 This paper estimates the effects on steady state retirement by men of changes in pension plans and social security in the 1970 s and 1980 s Work incentives associated with pension coverage and plan characteristics are calculated primarily from the 1969 79 Retirement History Study and the 1983 and 1989 Surveys of Consumer Finances Simulations with a structural retirement model suggest that the long run effects of changes in pension plans and social security account for about a quarter of the reduction in full time work by men in their early sixties none of
