Assessment of Addictive Behaviors Dennis M. Donovan, G. Alan Marlatt, 1988-06-17 Only a decade ago addictive behavior was defined as chemical dependence on alcohol or opiates As each addictive drug was seen as unique the professional and scientific disciplines investigating them worked in relative isolation Moreover while physiological psychological behavioral and social factors were recognized as important in the etiology of addiction these domains were not integrated into a unified model Now a more generic view of addictions is emerging As analyzed in ASSESSMENT OF ADDICTIVE BEHAVIORS similar processes occur across a wide range of behaviors such as drinking smoking eating and drug use With this broadened view research has shifted from the evaluation of treatment interventions to more process oriented studies of the multiple factors contributing to the maintenance of and relapse to addictive behaviors As research is becoming increasingly integrated across disciplines addiction now may be defined as an interactive product of learning in a setting involving physiological events as they are interpreted labeled and given meaning by the individual

Handbook of Clinical Behavior Therapy with Adults Alan S. Bellack, Michel Hersen, 2012-12-06 Despite the occasional outcries to the contrary the field of behavior therapy is still growing and the asymptote has not been reached yet The umbrella of behavior therapy continues to enlarge and still is able to encompass new theories new concepts new research new data and new clinical techniques Although the number of new behavioral journals now has stabilized we still see a proliferation of books on the subject In the past few years however we have seen considerable specialization within behavior therapy No longer is it possible to be a generalist and remain fully abreast of all the relevant developments Thus we see behavior therapists who deal with adults those who deal with children those whose specialty is hospital psychiatry and those who see themselves as practitioners of behavioral medicine Even within a subarea such as behavioral medicine specialization runs supreme to the extent that there are experts in the specific addictions adult medical problems and child medical problems Given the extent of specialization there are numerous ways to skin the proverbial cat We therefore have chosen to look at the contemporary work in behavior therapy that is being carried out with adults in part of course because of our long standing interest in this area as teachers researchers and clinicians In so doing we have chosen to highlight the clinical aspects of the endeavor but not at the expense of the rich research heritage for each of the specific adult disorders
