Assets Forfeiture Study Of Policy And Its Practice:

Assets Forfeiture Gregory M. Vecchi, Robert T. Sigler, 2001 The desire to generate revenue from the sale of illegal drugs has produced a complex system of fines and forfeiture statutes that seek to deprive drug traffickers of the financial incentive for engaging in the manufacture and sale of drugs and to generate revenue from drug trafficking As a result the purpose of drug enforcement may be confusing to the players That is it is possible that the primary goal of drug enforcement may come to be oriented toward the production of maximum revenue rather than toward the minimum reduction in illicit drug flow As such the provisions of recent forfeiture legislation may have enhanced this potential In *Assets Forfeiture* Vecchi and Sigler address the potential for abuse of assets forfeiture They identify bureaucracy as an insulator against corruption and investigate assets forfeiture as a revenue generator for federal state and local governments The book also discusses the potential dichotomy of public policy between the upper levels of law enforcement agency management and its lower echelons of the officers on the street **FBI Law Enforcement Bulletin**, 2004 *The Politics of Federal Prosecution* Christina L.

Boyd, Michael J. Nelson, Ian Ostrander, Ethan D. Boldt, 2021-01-01 Prosecutors hold incredible power in the United States to decide when and how to dispense justice They are in many ways the agenda setters of the criminal justice system While prosecutors and politicians frequently and loudly claim that prosecutors act independent of political influence the potential for politics to affect prosecutors and their decisions looms large This book examines political influence over federal prosecution at every stage from who becomes a prosecutor to what explains the decisions they make while in office

Encyclopedia of Criminology J. Mitchell Miller, Richard A. Wright, 2013-12-17 This three volume work offers a comprehensive review of the pivotal concepts measures theories and practices that comprise criminology and criminal justice No longer just a subtopic of sociology criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology political science behavioral science law economics public health family studies social work and many others The three volume *Encyclopedia of Criminology* presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single authoritative reference work More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive international resource The pivotal concepts measures theories and practices of the field are addressed with an emphasis on comparative criminology and criminal justice While the primary focus of the work is on American criminology and contemporary criminal justice in the United States extensive global coverage of other nations justice systems is included and the increasing international nature of crime is explored thoroughly Providing the most up to date scholarship in addition to the traditional theories on criminology the *Encyclopedia of Criminology* is the essential one stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field **The Limits of Asset Confiscation** Johan Boucht, 2017-06-01 This book provides a normative analysis of the justifications and limits of asset confiscation as a crime control measure in a

comparative perspective More specifically it deals with what in this context is referred to as extended appropriation that is confiscation in cases where the causal link between the property the proceeds of crime in question and the predicate offence is less obvious Particular focus is placed on extended criminal confiscation and civil recovery These forms of confiscation give rise to a number of complex legal issues The overarching purpose of the book is to provide an analysis of the nature of extended appropriation within the criminal justice system and to discuss a normative framework that may assist in assessing the legitimacy of such confiscation schemes It also seeks to explore what a fair and reasonable balance between the interests of the state and those of the individual in this field might look like The analysis starts from an acknowledgement not only of the need for having effective confiscation regimes in place but also of the need for protecting the interests of the individual It is hoped that the book will stimulate further discussion on the legitimacy of asset recovery as a crime control measure

Current Publications in Legal and Related Fields ,2002 **Law Books Published** ,2001 **Asset Recovery Handbook** Jean-Pierre Brun,Anastasia Sotiropoulou,Larissa Gray,Clive Scott,Kevin M. Stephenson,2020-12-10 The Asset Recovery Handbook is a practical tool to help policymakers public officials and those who have been entrusted with recovering stolen assets by informing them on how to pursue proceeds of corruption and navigate the challenges of international asset recovery University of Illinois Studies in the Social Sciences ,1916 University of Florida Journal of Law and Public Policy ,1994 **Criminology, Penology and Police Science Abstracts** ,1994 **Research Methods J.** Mitchell Miller,Richard A. Tewksbury,2005 For undergraduate and graduate level courses in Research Methods in Criminal Justice departments This practical new text exposes students to the realities of research and focuses on the planning design conduct analysis and ethical aspects of qualitative research Using real world examples student friendly discussions and ample illustrations students will learn how the processes and decisions of qualitative work produce theoretically and pragmatically important research findings *The Argus* ,1904 Personal experiences, observations, and studies in Japan, 1870-1874 William Elliot Griffis,1898 *Handbook of Research on the Illicit Drug Traffic* F. LaMond Tullis,LaMond Tullis,United Nations Research Institute for Social Development,1991-09-30 Focusing on a highly controversial and fiercely debated subject this survey tracks the social and economic consequences of the production trafficking and consumption of cocaine heroin and cannabis From a growing body of literature LaMond Tullis has extracted the most salient economic social and political themes currently under discussion in both scholarly publications and in the responsible press The two part volume consisting of a lengthy review of relevant literature and an annotated bibliography helps its users understand the major issues Can and should consumption be curtailed supplies suppressed and traffickers eliminated Can the unintended economic social and political consequences of curtailing suppressing and eliminating somehow be mitigated Should these drugs be legalized Would legalization produce its own array of unintended and largely unacceptable consequences Although tentative answers to these questions abound this excellent resource is testimony to the fact that there is still little agreement

on how to deal with these powerful substances and the problems they generate Tullis's compilation presents the best overview of this complex subject to date The first half of this two part reference consists of a survey of the published literature on the production and consumption of the three illicit drugs Chapters are devoted to the global patterns of production and consumption of cocaine heroin and cannabis to the consequences both positive and negative of drug consumption and production and to the policy measures that have been adopted or are under consideration in both consuming and producing countries These chapters will be of interest to those wishing to obtain an overall view of the subject and to specialists seeking a guide to the literature outside their particular area of knowledge The second half of the book contains an annotated bibliography of about 2 000 items covering works published in English plus a few in Spanish as books articles or press reports This section will be invaluable to researchers working on the frontiers of the subject and to general readers who wish to pursue particular topics in greater depth The volume should be at the fingertips of policy makers legislators law enforcement officials judges and social workers as well as students and teachers

The Review,1902 Extreme Methods J. Mitchell Miller,Richard A. Tewksbury,2001 This book promotes the criminological ethnographic enterprise which is the use of alternative qualitative research methods to study crime and deviance **The Money Trail** Brent Fisse,David Fraser,Graeme Coss,1992 Few areas of law have developed as rapidly and with such fleeting attention to principle and policy as Australia's money trail legislation **The American Exchange and Review**,1885 *The Sydney Record*,1885
