Assisted Suicide Finding Common Ground:

Assisted Suicide Lois Snyder, Arthur L. Caplan, 2002 There is no constitutional right to physician assisted suicide says the U S Supreme Court Most states have laws against it but states can also allow it as Oregon has done others are considering legalization Still very little guidance has been offered about its practice *Assisted Suicide Finding Common Ground* fills that void A diverse group of experts some for some against provide a framework for thinking about what assisted suicide particularly physician assisted suicide is and how its legalized practice might be guided The book does not take a position on the continuing debate about the morality or wisdom of legalizing assisted suicide But physician assisted suicide is now taking place and the more pressing concerns are those pertaining to its implementation Editors Lois Snyder and Art Caplan attempt to find common ground on those real world concerns Among the questions asked and answered are What is assisted suicide Is physician assisted suicide different from refusal of treatment Are there alternatives to assisted suicide How useful are currently available guidelines for physician assisted suicide Who should have access to what Does assisted suicide necessarily mean physician assisted suicide Can the practice be effectively and meaningfully regulated How should physicians respond to requests for assisted suicide Assisted suicide is one of the most ethically challenging issues in medicine and bioethics defining who we are and want to be as individuals and as a society This book takes a hard look at alternatives to the practice the implications for the patient physician relationship who should write guidelines and how to regulate physician assisted suicide and establish safeguards so that it is voluntary and an option of last resort **Ethics, Law, and Aging Review, Volume 9** Marshall B. Kapp, JD, MPH, FCLM, 2003-08-15 This volume explores the concept of safety as applied in the long term care context Chapters examine the way in which the quest for safety may work either synergistically or adversely upon other worthy social goals Among the initiatives considered are promoting the decision making autonomy of patients clients and their surrogates enhancing the quality of care and quality of life available to long term care residents and providing fair compensation for injured victims when serious harm occurs Questions addressed that are of concern to legal and ethical theorists social science researchers and patient client advocates include To what extent do litigation and or regulation accomplish the safety and other legitimate objectives of public policy in the long term care arena Do the costs of various approaches outweigh the benefits in promoting safety and other goals How do litigation and regulation compare with alternative approaches to achieving the same goals in terms of an acceptable cost benefit balance *Angels of Death* Roger S. Magnusson, Peter Harry Ballis, 2002-01-01 This groundbreaking book uncovers the hidden world of illicit physician assisted suicide and euthanasia Through the frank and often troubling first hand accounts of health professionals who have been involved in assisted death the book records for the first time this secret but real area of medical and nursing practice Through face to face interviews with these angels of death Roger S Magnusson explores the social practices relationships and networks that constitute underground euthanasia How is assisted death actually practiced within health care settings

What are the issues that surround the making of such a momentous decision How do health care workers justify their attitudes and actions in this area Angels of Death offers detailed answers to these questions and many others The doctors nurses and therapists who were interviewed pseudonymously for this study work in the HIV AIDS communities in the United States and Australia Their perspectives and practices their attitudes and feelings illuminate the assisted death debate and expose a variety of disturbing issues including the reality of botched attempts euthanasia without consent and unduly hasty measures to bring about death The testimony of medical practitioners combined with Magnusson s thoughtful assessment of the issues will be of intense interest to both opponents and advocates of proposals to legalize euthanasia

Cumulated Index Medicus ,1997 [Crime Without Punishment](#) Lawrence M. Friedman,2018-05-31 In this compelling book Lawrence M Friedman looks at situations where killing is condemned by law but not by social norms and therefore is rarely punished He shows how penal codes categorize homicides by degree of intent which are in turn based on society s sense of moral outrage Despite being officially defined as murder many homicides have historically gone unpunished Friedman looks at early vigilante justice crimes of passion murder of necessity mercy killings and assisted suicides In his explorations of these unpunished homicides Friedman probes what these circumstances tell us about conflicts in social and cultural norms and the interaction of law and society

Ethical Issues in Neurology James L. Bernat,2008 Written by an eminent authority from the American Academy of Neurology s Committee on Ethics Law and Humanities this book is an excellent text for all clinicians interested in ethical decision making The book features outstanding presentations on dying and palliative care physician assisted suicide and voluntary active euthanasia medical futility and the relationship between ethics and the law New chapters in this edition discuss how clinicians resolve ethical dilemmas in practice and explore ethical issues in neuroscience research Other highlights include updated material on palliative sedation advance directives ICU withdrawal of life sustaining therapy gene therapy the very low birth weight premature infant the developmentally disabled patient informed consent organizational ethics brain death controversies and fMRI and PET studies relating to persistent vegetative state

Implementation of Proposition 71, the Stem Cell Research and Cures Initiative California. Legislature. Senate. Committee on Health,2005

Euthanasia, Morality, and the Law Kumar Amarasekara,Mirko Bagaric,2002 This book assesses the desirability of legalising euthanasia From the ethical perspective euthanasia raises many important issues including the right to life the right to liberty the avoidance of unnecessary pain the appropriate allocation of medical resources and the rights and duties of doctors Other relevant considerations include the improving standard of palliative care and the slippery slope argument The central arguments for and against euthanasia are evaluated against the background of the leading contemporary moral theories This book seeks to cut through the rhetoric that has become a feature of the debate and asks whether there is a sound reason for denying the wishes of individuals who express their wish to die

Bioethics Literature Review ,2000

Suicidal Behaviour in South Africa Lourens Schlebusch,2005 Suicidal behavior in the world and in South Africa has reached critical proportions This cuts across all ethnic gender and age groups A disturbing shift has emerged as increasingly more young and black South Africans are affected This book explores why individuals succumb to suicidal behavior It examines and updates current statistics that provide clues to the circumstances surrounding suicidal behavior It questions the misconceptions associated with such behavior while offering prevention and management solutions and suggesting further research needs It is extremely important to educate health care workers and the general public on preventing suicide The price of neglecting this is too high
