Asian Philosophy:

Classic Asian Philosophy Joel J. Kupperman, 2006-11-16 This is a second revised edition of Kupperman's introduction to Asian philosophy via its canonical texts. Kupperman ranges from the Upanishads to the Bhagavad Gita through Confucius to Zen Buddhism, walking students through the texts, conveying the vitality and appeal of the works and explaining their philosophical roots. Kupperman has made revisions throughout the text, clarifying where necessary and added a new chapter on al-Arabi's *The Bezels of Wisdom*, a classic of Islamic Sufism.

Human Rights and East Asian Philosophy Benedict S. B. Chan, Baldwin Wong, 2026-04-22 Human rights, viewed as universal moral rights since the 1948 Universal Declaration, are increasingly examined in relation to non-Western traditions. This edited volume explores the intersection of East Asian philosophies—Confucianism, Buddhism, and Daoism—with human rights discourse, examining whether these ancient traditions can accommodate universal values while preserving their core philosophical foundations. The collection features scholarly analyses of how traditional East Asian thought engages with contemporary human rights, including privacy rights, environmental rights, and epistemic rights. The work demonstrates how these philosophical traditions offer unique interpretations that both challenge and enrich the Western paradigm of human rights. The volume provides critical insights into cross-cultural dialogue and the potential for more inclusive global human rights frameworks. This book serves philosophers, political theorists, human rights scholars, and scholars of Asian intellectual traditions. It appeals to those researching multicultural approaches to human rights, comparative ethics, and the dialogue between tradition and modernity.

Learning from Asian Philosophy Joel J. Kupperman, 1999-11-04 In an attempt to bridge the vast divide between classical Asian thought and contemporary Western philosophy, Joel J. Kupperman finds that the two traditions do not, by and large, supply different answers to the same questions. Rather, each tradition is searching for answers to their own set of questions, mapping out distinct philosophical investigations. In this groundbreaking book, Kupperman argues that the foundational Indian and Chinese texts include lines of thought that can enrich current philosophical practice and, in some cases, provide uniquely sophisticated insights. Special attention is given to the ethical issues of formation and fluidity of self, the nature and possibilities of choice, the compartmentalization of life implicit in some ethical systems, the variations of ethical demands from person to person, and the nature of philosophy itself as a communicative activity. This study will provide a wealth of information for philosophers seeking a closer knowledge of Asian philosophy and general readers with an interest in Eastern thought.
