## **Aspects Of Metaphor:**

**Aspects of Metaphor** Jaakko Hintikka, 2013-03-09 Metaphor is one of the most frequently evoked but at the same time most poorly understood concepts in philosophy and literary theory In recent years several interesting approaches to metaphor have been presented or outlined In this volume authors of some of the most important new approaches re present their views or illustrate them by means of applications thus allowing the reader to survey some of the prominent ongoing developments in this field These authors include Robert Fogelin Susan Haack Jaakko Hintikka with Gabriel Sandu Bipin Indurkha and Eva Kittay with Eric Steinhart Their stance is in the main constructive rather than critical but frequent comparisons of different views further facilitate the reader s overview In the other contributions metaphor is related to the problems of visual representation No l Carroll to the open class test Avishai Margalit and Naomi Goldblum as well as to Wittgenstein s idea of a way of life E M Zemach

**Aspects of Metaphor in Physics** Hanna Pulaczewska, 1999 For decades there has been awareness of the fact that the natural sciences and the language they use are not metaphor free domains This study draws together statements on this phenomenon made in a discourse context hitherto dominated by theoreticians and philosophers of science and points up new perspectives of an interdisciplinary nature discussed here primarily from the viewpoint of cognitive semantics How do metaphors enter into a discourse with physics To what extent are the methods used and the issues addressed in physics influenced by metaphors How do the ubiquitous metaphors of everyday language help us to impose a structure on physics knowledge and express abstract ideas in concrete images These and other related issues are discussed with reference to copious examples

**Metaphor and Metaphorology** Miriam Taverniers, 2002

**The Ubiquity of Metaphor** Wolf Paprotté, René Dirven, 1985-01-01 This volume brings together a number of articles representative of the present outlook on the importance of metaphors and of the work done on metaphors in several domains of psycho linguistics The first part of the volume deals with metaphor and the system of language The second part offers papers on metaphor and language use In the third part psychological and psycholinguistic aspects of metaphor are discussed

Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor

research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios

A Cognitive Theory of Metaphor Earl R. Mac Cormac, 1985 In this book Earl Mac Cormac presents an original and unified cognitive theory of metaphor using philosophical arguments which draw upon evidence from psychological experiments and theories He notes that implications of this theory for meaning and truth with specific attention to metaphor as a speech act the iconic meaning of metaphor and the development of a four valued system of truth Numerous examples of metaphor from poetry and science are presented and analyzed to support Mac Cormac s theory A Cognitive Theory of Metaphor takes up three levels of explanation metaphor as expressed in surface language the semantics of metaphor and metaphor as a cognitive process and unifies these by interpreting metaphor as an evolutionary knowledge process in which metaphors mediate between minds and culture Mac Cormac considers and rejects the radical theory that all use of language is metaphorical however this argument also recognizes that the theory of metaphor may itself be metaphorical The book first considers the computational metaphor often adopted by cognitive psychology as an example of metaphor requiring analysis In contrast to three well known philosophical theories of metaphor the tension theory the controversion theory and the grammatical deviance theory it develops a semantical anomaly theory of metaphor based on a quasi mathematical hierarchy of words In developing the theory Mac Cormac makes much needed connections between theories of metaphor and more orthodox analytic philosophy of meaning including discussions of speech acts and the logic of fuzzy sets This semantical theory of explanation is then shown to be compatible with contemporary psychological theories of memory Earl R MacCormac is Charles A Dana Professor of Philosophy and Chairman of the Department of Philosophy Davidson College A Bradford Book

The articles illuminate issues such as why and under what circumstances people produce figurative expression and how it is moulded by their aims. By focusing on production the intention is to help stimulate more academic research on it and redress historically lower levels of published work on generation than on understanding of figurative expression. The contributions stretch across various academic disciplines mainly psychology, cognitive linguistics and applied linguistics but with a representation also of philosophy and artificial intelligence and across different types of endeavour: theoretical investigation and model building, experimental studies and applications focussed work for instance figurative expression in product design and online support groups. There is also a wide ranging introductory chapter that touches on areas outside the scope of the contributed articles and discusses difficult issues such as a complex interplay of production and understanding.
