193 **Riddoch on the Outer Hebrides** Lesley Riddoch, 2022-05-15 Riddoch on the Outer Hebrides is a thought provoking commentary based on broadcaster Lesley Riddoch's cycle journey through a beautiful island chain facing seismic cultural and economic change Her experience is described in a typically affectionate but hard hitting style with humour anecdote and a growing sympathy for islanders tired of living at the margins but fearful of closer contact with mainland Scotland [Alvar Aalto and Urban Design](#) Robert Cody, Angela Amoia, 2025-10-24 This book provides a fresh look at Alvar Aalto's regional and community planning work particularly the ways in which he incorporated sustainability resiliency energy and health and examines how contemporary architects and planners can learn from this approach for the betterment of 21st century urban design and our future cities The Alvar Aalto Atelier planned and promoted regional development that combined ecological features considered density and offered a framework for informality including flexible adaptable infrastructures with physical plans integrating communities with nature These plans were largely suburban and contained vital lessons on how to deal with sprawl traffic landscape energy labor and industry This book analyzes letters writings and drawings not seen outside the Alvar Aalto Foundation to review alternative ways to examine suburban landscapes and urban typologies through sustainability ecology and use of digital technologies This is an essential read for all those interested in the urban design work of Alvar Aalto Written in an accessible way for those new to the work of Aalto Architecture and Urban Design students of all levels will also find this a helpful guide on ecologically and socially responsible design **Octopus's Garden** Benjamin T. Jenkins, 2023-07-10 As Southern California recovered from the collapse of the cattle industry in the 1860s the arrival of railroads attacked by newspapers as the greedy octopus and the expansion of citrus agriculture transformed the struggling region into a vast idealized and prosperous garden New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads The influx of capital industrial technology and workers especially people of color energized Southern California and tied it more closely to the economy and culture of the United States than ever before Benjamin Jenkins's Octopus's Garden argues that citrus agriculture and railroads together shaped the economy landscape labor systems and popular image of Southern California Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s While investment from white Americans particularly wealthy New Englanders formed the financial backbone of the Octopus's Garden citrus and railroads would not have thrived in Southern California without the labor of people of color Many workers of color took advantage of the commercial

developments offered by railroads and citrus to economically advance their families and communities however these people also suffered greatly under the constant realities of bodily harm low wages and political and social exclusion Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non white laborers by stereotyping them in advertisements and publications These practices fostered conceptions of California s racial hierarchy by praising privileged whites and maligning the workers who made them prosper The Octopus s Garden continues to shape Southern Californians understanding of their past In bringing together multiple storylines Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history

Pickover,2014-07-01 An ecological disaster spawns an eight legged sea monster in this collaboration between the science fiction author and acclaimed nonfiction writer Millions of readers have enjoyed the books of Piers Anthony including but certainly not limited to his undeniably popular Xanth and Blue Adept series Now in collaboration with celebrated nonfiction author Clifford A Pickover he brings us a disturbing tale of our own world and the strange creatures with whom we share it It is said and truly that there are more things under heaven and earth than there are almost anywhere else true as well that many of them lurk unsuspected far below the surface of the planet s ocean For thousands of years mankind has simultaneously trusted in the sea s proverbial generosity and used it as a dumping ground trusting that in its vastness his

garbage will be swallowed up and forgotten But that was never really true And now in an age when the overcrowded Earth swarms with hungry inhabitants whose waste chokes even the sea whose greedy demands overtax its seemingly endless bounty strange things are born in the ocean s depths strange things that the ocean throws back upon the land
