Assessing Language Production In Children:

Assessing Language Production in Children Jon F. Miller,1981 Assessing Language Production in Children ,1981

Language Disorders from Infancy Through Adolescence Rhea Paul,2007-01-01 This text provides students with the information needed to properly assess childhood language disorders and decide appropriate treatments The book covers language development from birth to adolescence **Language Development and Disorders** W. Yule,M. Rutter,1987

Communication disabilities are common although their precise nature and degree of severity vary greatly among individuals They are among the most handicapping of disabilities because they isolate a person and in so doing restrict social educational and occupational opportunities One of the purposes of this book was to bring together theoretical practical and clinical knowledge from several disciplines that bear on language and communication into some reasonably accessible form The intent is to provide a broad and multi faceted view of language development and language disorders Thus contributions from education linguistics psychology pediatrics psychiatry neurology neuropsychology and speech therapy are included They describe our current knowledge of language development suggest classifications for language pathology outline what is known of the epidemiology of language difficulties consider assessment and therapy alternative communication systems and the impact of the new technology on communication aids The variety of perspectives that it provides will make it particularly useful to the range of specialists who are concerned with the development of communication skills and language disorders

Children's Language Carolyn E. Johnson,John H.V. Gilbert,2013-01-11 This volume brings together the work of 32 scholars from 13 countries investigations of children learning 15 different languages in some instances more than one at a time The scope of this work as broad as it is only partially represents the research interests and approaches of the more than 350 scholars from 34 countries who contributed papers or posters to the Sixth International Congress for the Study of Child Language This investigative power and diversity are for the most part focused on topics and issues of modern day child language research that have been under discussion for the last 30 years or so Some even go beyond that in early diary studies and philosophers speculations While the issues are mainly familiar ones the 17 chapters contribute to the advancement of child language study in several specific ways They represent current theoretical frameworks both bringing the insights of the theories to the interpretation of language development and testing tenets or implications of the theories with child language data contribute substantively to the crosslinguistic study of child language reflecting both the linguistic diversity of the authors themselves and a recent major shift in the approach to child language study build on the now considerable body of knowledge about children s language both adding to information about the basic systems of phonology syntax and semantics and extending beyond to explore aspects of narrative and literacy development language acquisition by bilingual and atypical children and language processing and contain hints of new directions in child language study such as increased attention to the impact of phonology on other language systems Taken as a whole this volume reflects the current

strength of crosslinguistic research the application and testing of new theoretical developments a new legitimacy of language disorder data and a new appeal to the descriptive possibilities of language processing models In addition there is a theme that runs through many of the chapters and points the way for important research in the future the role of prosody in the acquisition of various language structures and systems

Assessing Children's Language in Naturalistic Contexts

Nancy J. Lund, Judith F. Duchan, 1993

Encyclopedia of Applied Developmental Science Celia B Fisher, Richard M.

Lerner, 2004-10-16 The most comprehensive one stop source for the latest in applied developmental science Don Floyd President and CEO National 4 H Council The Encyclopedia of Applied Developmental Science is an important and timely contribution to this burgeoning field This four volume set is the authoritative source that encompasses the entire range of concepts and topics involved in the study of applied developmental science Its contents and levels have broad appeal for those interested in how the application of knowledge about human development can be used to enhance the lives of individuals families and communities The breadth of activity in applied developmental science makes adequate representation of its concepts and topics a daunting challenge To this end the encyclopedia seeks to answer the following questions How may information about this field be integrated in a manner accessible meaningful and useful to the next generation of the leaders of our nation and world How may we best convey the knowledge necessary for them to understand the nature of their development and the way that they may contribute positively to their own lives to their families and communities and to the designed and natural environments of which they will be stewards The Encyclopedia of Applied Developmental Science provides the most effective way to address these questions It includes entries written in an authoritative but not overly technical manner by the broad range of scholars and practitioners involved in applied developmental science In addition to an alphabetical table of contents there is a readers guide that organizes the entries into 30 content categories to help the reader locate similarly themed entries with ease The encyclopedia is ideal for libraries serving those with interests in psychology human development human ecology education sociology family and consumer sciences and nursing as well as social work and other human services disciplines The entries are written to be accessible to not only professionals but also to policy makers and other potential consumers of applied developmental science scholarship This includes young people and their parents teachers and counselors Topics Covered Adolescent Development ADS Training and Education Adult Development Biographies of Applied Developmental Scientists Child Development Civic Engagement Culture and Diversity Development Promoting Interventions Developmental Assessment Developmental Disorders Developmental Processes Developmental Risks Ecology of Human Development Emotional and Social Development Ethics Families Foundations Health Historical Influences Infant Development Organizations Parenting Personality Development Religiosity and Spirituality Research Methodology Schools Social Issues Theory Universities Youth Programs Advisory Board Peter Benson President Search Institute Joan Bergstrom Wheelock College Nancy A Busch Rossnagel Fordham University
