## **Assessment Of Aphasia:**

**Assessment of Aphasia** Otfried Spreen, Anthony H. Risser, 2002-11-21 Spreen and Risser present a comprehensive critical review of available methods for the assessment of aphasia and related disorders in adults and children. The authors explore test instruments and approaches that have been used traditionally for the diagnosis of aphasia ranging from bedside screening and ratings to tests of specific aspects of language and to comprehensive and psychometrically standardized aphasia batteries. Coverage of other methods reflects newer trends including the areas of functional communication testing of bilingual patients, psycholinguistic approaches and pragmatic and discourse related aspects of language in everyday life. The authors also examine the expansion of language assessment to individuals with non aphasic neurological disorders such as patients with traumatic brain injury, lesions of the right hemisphere, the healthy elderly and individuals with dementia. Taking a flexible and empirical approach to the assessment process in their own clinical practice, Spreen and Risser review numerous test instruments and their source for professionals and students in training to choose from in their own use. The introductory chapters cover the history of aphasia assessment, a basic outline of subtypes of aphasia both neuro-anatomically and psycholinguistically and the basic psychometric requirements for assessment instruments. The final part discusses issues in general clinical practice, specifically questions of test selection and interpretation. The book is a thorough and practical resource for speech and language pathologists, neuropsychologists and their students and trainees. [The Assessment of Aphasia and Related Disorders](#)

Harold Goodglass, Edith Kaplan, Barbara Barresi, 2001. The Boston Diagnostic Aphasia Examination Set is a group of eight products that helps clinicians distinguish among neurologically recognized aphasic syndromes. This widely used set of tools is an imperative instrument for assessing the impairment of aphasia. It is a common language for researchers and clinicians and a source from which knowledge about aphasia has flourished. New features of the third edition include a carefully standardized short version that offers a brief assessment, supplemental measures incorporated into test materials, new statistical bases for the revised examination and a fully updated edition of the text. The Assessment of Aphasia and Related Disorders. Other products in the Boston Diagnostic Aphasia Examination Set include the Stimulus Cards, Record Booklet, Stimulus Cards Short Form, Short Form Record Booklet, Boston Naming Test, the Boston Naming Test Record Booklet and the Examining for Aphasia with the BDAE video. **The Assessment of Aphasia and Related Disorders** Harold Goodglass, Edith Kaplan, 1983.
