exploring the reality of how service providers the doctors social workers and community nurses respond to carers It looks at which carers get help and why analyzing how age relationship class and gender structure the responses of service providers and carers It examines the moral and policy issues posed by trying to incorporate carers interests into service provision What would services look like if they took the needs of carers seriously How far can they afford to do so Is this only achieved at the expense of disabled people What is the proper relationship between carers and services Carers pose in acute form many of the central dilemmas of social welfare and the account presented here has the widest significance for the analysis of community care Focusing on the views of carers as well as service providers the book looks at caring across a variety of relationships and conditions including people with mental health problems and learning disabilities
