Global Technology Transfer John Chumack, 2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out This book presents the issues and offers a comprehensive bibliography for easy access

Current Controversies in the Biological Sciences Karen Faye Greif, Jon Frederick Merz, 2007 In recent years advances in biological science and technology have outpaced policymakers attempts to deal with them *Current Controversies in the Biological Sciences* examines the ways in which the federal government uses scientific information in reaching policy decisions providing case studies of the interactions between science and government on different biomedical biological and environmental issues These case studies document a broad range of complex issues in science policy from the Human Genome Project to tobacco regulation and provide an accessible overview of both the science behind the issues and the policy making process The cases illustrate the different ways in which science and politics intersect in policy decisions as well as the different forms policy itself may take

including not only regulatory action but the lack of regulation Among the topics examined are public and private research funding as seen in gene patenting reluctance to regulate even when a product has been proven unhealthy as in the case of tobacco a comparison of U S and international policy responses to genetically modified organisms and the competing interests at play in air pollution policy Each chapter includes shorter side essays on related topics for example essays on issues raised by the SARS epidemic accompany the detailed case study of the public health response to the anthrax laced mail received in the weeks after 9 11 This clear and readable introduction to controversial issues in the biological sciences will be a valuable resource for students of science policy and bioethics and for professionals in industry government and nongovernmental organizations who need background on emerging issues in the biological sciences
