**Step 1 The Planning Stage** Before you do anything you need to come up with a plan This means Coming up with a brand and website name Pick a brand name that is descriptive but unique Deciding on your niche Popular examples Fitness Finance Making money online Business Relationships Games Music Film Whatever you decide just make sure that the subject you pick is something that is Profitable Interesting to you Popular But not saturated You can also come up with your own niches by going for broader subjects or by combining multiple topics into a single new niche

**Step 2 Setting Up** Now you have your business model in mind it s time to start constructing your blog Choose a CMS or blogging platform Popular choices are WordPress BlogSpot Live Journal Tumblr Joomla Drupal The best option is to download WordPress for your SELFHOSTED site and then to install it on a server Use BLUEHOST to set up your server space and URL Now Choose a unique theme a paid or custom theme is better Change the color scheme to be something that echoes your branding and adheres to color theory Pick a custom font Outsource if you need help doing this Freelancing sites include Freelancer UpWork Elance

**Step 3 Adding Content** The most important thing for any blog is the content Make sure you add high quality content and that you add it regularly You can t expect to get a full time job from blogging unless you re willing to work full time at it Think of topics that are unique and haven t been covered before and that are inherently interesting Use keyword research tools to get ideas for the kind of things people are looking for in your niche and that are likely to be successful from an SEO

perspective therefore Read the sites of competitors for inspiration and ideas Read news sites and particularly those with separate categories for finance business health etc Look around forums for inspiration Remember you can also create curated content which is content you've gathered and collected into one place Step 4 Socializing Your Blog Next you need to add a social element to your blog This is very important because it lets you share your content and gives it the potential to go viral Think of your target audience as you write the blog Share to Facebook Twitter and LinkedIn as you post Be everywhere have a social media account on all of the major social networks Add social sharing buttons to your website to allow visitors to share your content as they wish Add Disqus to your website This is a plugin that provides support for blog comments and is very feature rich effective and popular Respond to comments and e-mails Consider every visitor a potential fan and don't underestimate the value of that Encourage conversation within your posts ask for opinions and elicit discussion Step 5 Add an Opt In Form This is a form that you will use to collect e-mail addresses whenever someone visits This allows you market to them again in future and is a very powerful tool Use GetResponse MailChimp Or Aweber As your autoresponder You can also use SumoMe for pop up windows that will let you collect e-mail addresses Step 6 Monetize Finally make sure your site is monetized
