**Diverging Pathways** Alan C. Kerckhoff, 1993-06-25

Social arrangements of society's institutions deflect people's achievement patterns. Some schools take only talented students; others take the rest. Within schools, students are separated into ability groups. Firms are in different industries and vary in size. During their educational and work careers, people get sorted into these different locations. *Diverging Pathways* examines that sorting process and shows how it affects people's achievements. Some locations accelerate achievements; others depress them in elementary, secondary, and postsecondary school programs and in the labor force. Most important, some people are consistently in the same kinds of locations, repeatedly advantaged or disadvantaged, especially in school. They end up far apart as adults, due in large part to the cumulative effects of the social arrangements they passed through. *Diverging Pathways* follows the members of a 1958 British birth cohort for the first twenty-three years of their lives. It presents a detailed picture of their family backgrounds and their school and early labor force experiences and achievements. Besides the cumulative effects of institutional locations, it shows major career differences of men and women and describes how the interface between postsecondary education and the labor force alters some of the outcomes of elementary and secondary schooling.

**Learning Begins at Home** Michael Young, Patrick McGeeney, 2023-07

First published in 1968, *Learning Begins at Home* records an attempt by two researchers to initiate and assess an innovation in a school in a working-class neighbourhood. The influence of parents upon children's achievement is a platitude of education. The vital question is whether schools can become centres for education for adults as well as children, influencing the parents directly and the children indirectly through the parents. The research reported in this book suggests that it would be worthwhile for teachers to give more of their time to cooperation with parents. This book will be of interest to students of education and sociology.

**Taking Control: How to Prepare Your School for Inspection** Paul Garvey, 2017-07-03

Ofsted don't allow their inspectors to offer advice to schools. But as a former inspector, Paul Garvey is able to use his experience to help headteachers prepare for inspections in order to help every school gain the grade it feels it deserves. His book is full of invaluable insights gathered from years of experience in inspecting thousands of different schools. He takes readers step by step through what schools need to be doing and not doing in advance to prepare and then walks readers through the inspection process from both the school's and inspector's point of view. Paul refers regularly to Ofsted's *School Inspection Handbook* in order to link his advice to the grading criteria. And finally, he guides readers on writing their self-evaluation form. This book is a must-have for any senior leadership team with an inspection due.
