Oomens,1976-07-31 The use of growth functions for estimating developments in consumer demand is already rather old In many books on mathematics for economists one can find one or more examples of growth functions however usually without any economic considerations as a background Furthermore there are many econometric contributions on the subject scattered over many books and journals In this book the English translation of the author s doctoral thesis Dr W J Oomens gives a highly unified treatment of the subject The book consists of two main parts preceded by an introduction and concluded by an application The first main part starts with a discussion of the general notions underlying the theory of the development of demand for new consumer durable goods and next describes the many models known from the literature using these general notions Because of the unified treatment the author succeeds in clearly ranking the different models in presenting the aspects they have in common and in explaining the properties which are different in the models being described The critical discussion of the existing models leads a o to a new model the heterogeneous generalized logistic model in which environmental variables are inserted into the purchase propensity function as well as into the function for the variable saturation degree Current Literature in Traffic and Transportation ,1973 *Behaviour of Lithium-Ion Batteries in Electric Vehicles* Gianfranco Pistoia,Boryann Liaw,2018-02-10 This book surveys state of the art research on and developments in lithium ion batteries for hybrid and electric vehicles It summarizes their features in terms of performance cost service life management charging facilities and safety Vehicle electrification is now commonly accepted as a means of reducing fossil fuels consumption and air pollution At present every electric vehicle on the road is powered by a lithium ion battery Currently batteries based on lithium ion technology are ranked first in terms of performance reliability and safety Though other systems e g metal air lithium sulphur solid state and aluminium ion are now being investigated the lithium ion system is likely to dominate for at least the next decade which is why several manufacturers e g Toyota Nissan and Tesla are chiefly focusing on this technology Providing comprehensive information on lithium ion batteries the book includes contributions by the world s leading experts on Li ion batteries and vehicles *The Effects of Urban Structure on Household Auto Ownership Decisions and Journey to Work Mode Choices* John F.
