A Land And Life Remembered Americo Liberian Folk Architecture:

A Land and Life Remembered Svend E. Holsoe, Bernard L. Herman, 1988 **Reading the Architecture of the Underprivileged Classes** Nnamdi Elleh, 2016-04-01 The expansion of cities in the late C19th and middle part of the C20th in the developing and the emerging economies of the world has one major urban corollary it caused the proliferation of unplanned parts of the cities that are identified by a plethora of terminologies such as bidonville favela ghetto informal settlements and shantytown Often the dwellings in such settlements are described as shacks architecture of necessity and architecture of everyday experience in the modern and the contemporary metropolis This volume argues that the types of structures and settlements built by people who do not have access to architectural services in many cities in the developing parts of the world evolved simultaneously with the types of buildings that are celebrated in architecture textbooks as modernism It not only shows how architects can learn from traditional or vernacular dwellings in order to create habitations for the people of low income groups in public housing scenarios but also demonstrates how the architecture of the economically underprivileged classes goes beyond culturally inspired tectonic interpretations of vernacular traditions by architects for high profile clients Moreover the essays explore how the resourceful dwellings of the underprivileged inhabitants of the great cities in developing parts of the world pioneered certain concepts of modernism and contemporary design practices such as sustainable and de constructivist design Using projects from Africa Asia South and Central America as well as Austria and the USA this volume interrogates and brings to the attention of academics students and practitioners of architecture the deliberate disqualification of the modern architecture produced by the urban poor in different parts of the world **Finding Colonial Americas** Joseph A. Leo Lemay, 2001 The stories now being told about the colonial American past represent an America newly found as scholars continue to evaluate and revise the longer standing stories that have across the centuries held particular cultural and critical sway This collection is a celebration of the widening of scholarly inquire in early American studies and a tribute to a leading early Americanist whose scholarly career continues to contribute to the opening up of crucial questions of canon *Historic York County* Michael C. Scoggins, 2009 **Design Dispersed** Burcu Dogramaci, Kerstin Pinther, 2019-06-13 *Design Dispersed* pursues the complex and heterogeneous connections between migration and design in the 20th and 21st centuries The edited volume gathers contributions by international researchers and curators on the question of how design practices and historical objects articulate respond to and critically reflect on migration flight and displacement Besides a collage which highlights the aesthetic effects resulting from the networking overlapping and mixing of forms another strand of the book looks at the political and social dimensions of design How are design objects material modes of a critical inquiry on movements of people and things What role do object trajectories play in the migr movements of the 1930s and 1940s Other texts follow the question of how migrants and refugees form their experience and political fight for acceptance into design and architectural productions A final essay contributes to

wordings and projections what vocabulary do we need in order to adequately think and write about a design dispersed

Robert R. Taylor and Tuskegee Ellen Weiss,2012-01-01 Ellen Weiss breaks important new ground in her remarkable monograph on Robert R Taylor This volume is by far the most detailed account we have of an African American architect Weiss vividly conveys the immense challenges faced by black architects and professionals of every kind especially during the rise of Jim Crow Along the way we get myriad insights on architectural education architect client relationships and the development of a major institution of higher learning Richard Longstreth George Washington University Architectural historian Ellen Weiss s book provides a wealth of little known factual information about Taylor and a scholarly historical analysis of his many contributions in architectural education and professional practice A must read for anyone with an interest in architecture and a certain reference for every architecture student Richard Dozier Dean Robert R Taylor School of Architecture Construction Science Tuskegee University Robert R Taylor s place in history as the first academically trained African American architect has been well known but an authoritative assessment of his contribution to American architectural and planning practice has remained elusive until now Weiss deftly interweaves the story of the Tuskegee campus with an examination of Taylor s pedagogy and the plight of black architects in the early twentieth century Gary Van Zante Curator of Architecture and Design Massachusetts Institute of Technology
