## **A Legacy Of Learning:**

**A Legacy of Learning** David T. Kearns, James Harvey, 2010-12-01 What's wrong with America's schools? Why can't we fix them? How did we wind up with dropout rates of 25 percent and graduates who can barely read and write? Why does the United States spend twice as much on education as the international average and wind up near the bottom of the barrel in global comparisons of student achievement? Why do we lag behind nations such as South Korea, Hungary, and Singapore? And how should we go about improving the situation? Answers to these questions lie at the heart of this volume. David T. Kearns and James Harvey contend we are fine-tuning failure. We have yet to break with the past in order to face a different and challenging future. Despite worshipping at the altar of local control, we have managed to create cookie-cutter schools across the country. We have been sidestepping the transparent need for common expectations about what students should know and be able to do. Standards, the authors say, are not clear enough or high enough. Above all, we have met the enemy and it is us—all of us support change as long as someone else is changing. This book is a fascinating and provocative analysis of where we went wrong and what we need to do to get American education back on track. It defines the kind of education our kids deserve. It calls for a new definition of public education in which choice is taken for granted. And it outlines an action agenda to help parents and citizens make first-class schools truly their own. In the future, the authors argue, we should think of a public school as any other non-profit entity capable of operating in the public interest, free of the red tape now strangling public education. It should be paid for by the public and accountable to the public, with its charter or contract routinely revoked when it stops serving public purposes or fails to meet its performance goals.

**A Legacy of Learning** Edward J. Power, 1991-01-01 *A Legacy of Learning* examines the principal periods in the history of European and American education beginning in ancient Greece and ending in twentieth-century America. It is a superior textbook for courses in the history of western education, tightly organized to cover the territory while developing a strong central theme addressing the continuities of western educational experience. Special attention is given to philosophies of knowledge, the content of instruction, cultural evolution, and educational policy. The history of education can be construed so broadly as to be unmanageable. Power's thoughtful organization and clear story-telling prose delineates and brings to life the watershed epochs in educational history.
