Einstein's Pathway to the Special Theory of Relativity Galina

Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity. Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts. One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door. He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office. The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905. For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905. Unfortunately there are no surviving notebooks and manuscripts, no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery. In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one, Relativity, was a rough draft at that point. In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity. The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed. The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein.

Einstein on Israel and Zionism

Fred Jerome, 2009-05-26 Albert Einstein thought and wrote extensively not just on the most difficult problems in physics but also in politics. For the first time this book collects his essays, interviews, and letters on the Middle East, Zionism, and Arab-Jewish relations. Many of these have never been published in English and all of them contradict the popular image of Einstein as pro-Zionist. He was offered and refused the Presidency of Israel but had he taken it he may have said things the Zionists didn't want to hear: he favored a non-religious state that would welcome Jew and Palestinian alike. One person's letters even Einstein's cannot resolve the crisis in the Middle East but decades later when horrors of the conflict in the Middle East are familiar to everyone, the reflections of one of the twentieth century's greatest thinkers are a signpost showing his commitment to social justice, understanding, and friendship between Jew and Arab.
