**Shopify, Dropshipping and Blogging** Paul J. Abramah, 2020-04-20 Want to become an expert in e-commerce business? Learn how to set up your e-shop and start earning now. Want to start your own business? Don't have the means to open a classic store? Shopify and dropshipping are the answer to all your problems. This way, you'll get to earn tons of money like the owners of popular stores, but without investing too much upfront. Dropshipping is an order fulfillment method that does not require a business to keep goods in stock. Instead, the store sells the product and passes on the sales order to a third-party supplier who afterward ships the order to the customer. Dropshipping is a great opportunity for entrepreneurs who are just starting out because it is not demanding as much as the traditional retail model. You don't need to have a physical location for the store, no need for paying overhead, and absolutely no need for stocking products. And to make things even better, you can have another passive income besides the one from your Shopify store. If you ever considered starting blogging, now is the perfect time. Running a blog does require some effort, but in return, you can have people pay you to advertise on your blog. You can find more info about online advertising in the book. This guide can help you start your business today or as soon as you read it. You just need some basic

**Dropship Guide for Beginners** Bri,2015-05-05 Today s savvy e commerce business owner knows how to compete In years past a business shopped for the products they wanted to resell They then purchased the items and stored them while

they searched for an end user or consumer Once the product was sold they shipped the item to their customer and hopefully made a profit This method is costly Besides the price of the item the seller pays shipping from the manufacturer or distributor to his location He then stores the item taking up resources and space until he resells the merchandise He invests time and effort into marketing the item and either he or the end user pays shipping again to their location All of these steps have to be factored into the price of the item to the end user The customer will decide if the end price of the item is a bargain and is competitive As the shipper if the item is lost or damaged in shipping the expense of filing tracking and claims falls on him as well Drop Shipping is a proven way of reducing or eliminating many of these expenses thus making the end price lower for the consumer and more profitable for the seller With drop shipping a seller or retailer does not purchase the item and store it for resale but rather sells the merchandise and ships it directly from the manufacturer to the consumer The seller does not have to store the item or pay shipping from the manufacturer to his location He does not have to handle the item himself This reduces chance of loss or damage and speeds up the process considerably He needs less start up money storage rental can be very costly and a product on hand that moves slower than anticipated can create a cash flow problem right out of the gate and can invest more time and money on his sales He also does not have to reship the item and there is only one shipping expense to absorb lowering the price of the item and making it of more value and profit for all concerned If there is loss or damage in shipping it falls on the manufacturer or distributor to provide the documents and file any claims with the shipping company involved Okay so all of this sounds great right But how do you get started This eBook will teach you how So let's get started
