Religious Festive Practices in Boston's North End Augusto Ferraiuolo,2012-11-14 In this lively and accessible book Augusto Ferraiuolo examines the many religious festivals in the Italian American community of Boston s North End Using interviews participant observation and visual data Ferraiuolo creates a vivid picture of how over the course of a summer season a number of religious festive practices are organized by multiple overlapping and to some extent competing voluntary organizations The central argument that emerges is that the community uses these festivals in part to help maintain and establish a variety of identities and that these identities are multistranded complex shifting and negotiated and thus ephemeral In addition Ferraiuolo shows in detail how individuals negotiate and construct identities as Italian Americans Scaccianesi Neapolitans Catholics and others within the context of these celebrations He also introduces a creative and original metaphor for understanding the ways in which selfhood is constructed arguing that contemporary identities function as hypertext in the manner of web based technologies linking to one another and building upon each other as constantly evolving technologies of the self The Trinity. Angels. Devils. Death. The soul. The Christian scheme.
