There are already many excellent works on the history of philosophy In justification of another reference work it may be pointed out that this one has been planned on different lines a cooperative work by many minds and with an emphasis upon periods of thought and upon broad characterizations of schools and systems Those who have joined in this venture are specially qualified in the particular field or subject upon which they have written Invited to participate by reason of the special study each has given to his subject in which he has already gained reputation among professional philosophers or by reason of courses he is now giving in the particular subject in college university or graduate school each author gives to his article the weight of mature thought and authority It is becoming increasingly clear that no one historian can be expected to deal with the specialization of scholarship in bringing to light fresh data and interpretations and in view of the many ramifications of the complicated subject matter Philosophers like all research specialists turn to definite areas for study and a history of so vast a field must take into consideration the results of this scholarship A cooperative volume thus justifies itself By System is here meant the general trend or course of thought of a particular time school or group of thinkers While references of course are made to classical and less well known names of the philosophical hierarchy with attention paid to their individual thought the main purpose of the volume is to direct attention not to the thinkers as such but to the main patterns of thought represented by them and their school Each writer has had in mind plain exposition rather than a defense of some particular view at the expense of it This is historical writing as it should be

System and History in Philosophy Adriaan Theodoor Peperzak, 1986-07-15 The book begins with the problem of the relationship between systematic philosophy and the history of philosophy Why does philosophy attach so much importance to history Consideration of this question is an essential part of metaphysics and it has important consequences for the methodology of both history and philosophy An analysis of the problem that begins the book leads to many other fundamental questions concerning the nature of philosophy In treating

these issues the author discusses positions taken on them by Russell Rorty Heidegger Gadamer Levinas Ricoeur Derrida and others of our century He also draws inspiration from Plato Plotinus Augustine Spinoza Kant Hegel and Nietzsche

At the Nexus of Philosophy and History Bernard P. Dauenhauer, 2010-12-01 The relationship between philosophy and history has long been a matter of contention Philosophers have claimed that their pursuit of universal law and eternal verities elevated them beyond historians who merely dabbled with the vagaries of the particular and the contingent Historians responded with the argument that philosophy was important only in relation to its contribution to concrete historical truth A greater challenge for both philosophers and historians than the defense of either of these positions has been to understand the convoluted issues surrounding the intersection of their respective disciplines In *At the Nexus of Philosophy and History* Bernard P Dauenhauer has collected eleven essays that explore the relationship between the two disciplines and provide a significant innovative response to the problems created by such exploration The original essays collected in this volume challenge the artificial distinctions and disciplinary parochialism that have too often characterized traditional academic debate Instead of advancing any one elaborate theory *At the Nexus of Philosophy and History* seeks to encourage a balanced approach toward the exploration of the two fields by demonstrating that a full understanding of the one is impossible without knowledge of the other
