The Fuss that Never Ended Deborah Gare, 2003 It is time to reassess the work of Geoffrey Blainey and consider his role in Australian history politics and public life Geoffrey Blainey has steered Australian history into the nation's conversation No one would dispute that he is a courageous public intellectual a writer of rare grace and a master storyteller And he has indeed provoked a rare fuss both public and professional with some of his comments on Asian immigration and Aboriginal land rights Blainey has challenged the academic history profession not only with his ideas but also by his practice A brilliant student he looked set for Oxford but chose instead the austere west coast of Tasmania for his postgraduate research For the next decade he earned a living with his pen And instead of political history in the traditional academic mould he wrote corporate histories that dispensed with footnotes Always probing and speculative Blainey has dislodged many of the keystones in our understandings of Australia's past He was one of the first to write about the expansive social history of this

land before 1788 he questioned whether Botany Bay was founded primarily as a convict colony he argued that the Eureka uprising had economic rather than political causes and he identified sport as a neglected key to the Australian character His controversial views earned such newspaper headlines as Brave Man Set Upon by Thugs for Telling Truth In The Fuss That Never Ended a lively and distinguished assembly of fellow historians and of various ages interests and political stances take a fresh look at Blainey's remarkable and sometimes controversial career *A Population History of Colonial New South Wales* Gordon W. Beckett, 2013 In this 10th volume of the economic history of colonial NSW the matter of population growth is reviewed with population gains coming from favorable economic drivers and economic cycles exploration immigration natural increase and British investment The historical approach to Statistical Data gathering its origins and reliability is outlined as are the statistics used and their interpretation The early musters of convicts is discussed together with commentary on the supporting data derived from the numbers of convicts on the store With the Aboriginal economy outperforming the white colony from 1788 to the early 1820s the operation of the Aboriginal economy is also discussed and the circumstances of its depopulation Adding to the population history is a statement that traditional reporting of the history is Britain settled the continent for strategic advantages and to find a source of raw materials for its industries as well as being an outlet for its trading and a takeover of local resources under its expanding economic system Economic development took place in their new colony beneficial mainly to British interests including industry trade insurance and investment As important as trade and investment became to the new colony the main aspect of the population history is the transfer of human capital in the form of over 160 000 convicted persons under a transportation program from the United Kingdom **Australian Book Review**, 1981 **County Gentleman and Land and Water**, 1909 **Taming the Great South Land** William J Lines, William J. Lines, 1991-01-01 Taming the Great South Land is the first full length landscape history of an entire continent occupied by one nation It is also in William Lines's telling a brutal and controversial story Examining the ways European society rapidly radically transformed Australia's physical and human landscapes the author writes candidly of repeated environmental devastation from the early slaughter of seals and whales to the destructive spread of sheep through gold rushes and land settlement to British nuclear tests and the modern mining and timber industries Lines shows how Enlightenment ideas of progress economic growth and development were reconstructed on Australian soil and how the promise of the conquest of nature became a mockery in fact resulting in the mass dislocation and destruction of indigenous populations This shocking narrative thoroughly researched and accessibly written combines environmental social and political history to hard hitting effect Taming the Great South Land is the first full length landscape history of an entire continent occupied by one nation It is also in William Lines's telling a brutal and controversial story Examining the ways European society rapidly radically transformed Australia's physical and human landscapes the author writes candidly of repeated environmental devastation from the early slaughter of seals and whales to the destructive spread of sheep through
