## **All China:**

**Freedom of Association in China and Europe** Yuwen Li, 2005-11-01 Understanding and exercising the right to freedom of association in a modern sense is a relatively new phenomenon in China. The reform of old social organizations and the emergence of new privately initiated non profit organizations only began to occur in the 1980s and such organizations continued to expand throughout the 1990s. Within a short period these new organizations have become a vibrant force in Chinese society. This unique volume, the first book in English to offer systematic and critical research in this field, is the outcome of a three year research project on the Legal Aspects of Social Organisations in China. The main aim of the project was to encourage Chinese researchers to deepen their knowledge and understanding of the current status of social organizations in China and to allow them to explore possible ways of creating a friendly legal environment conducive to the exercise of the right to freedom of association. The book contains some of the best results of the Chinese researchers work and papers presented by European experts at two international seminars organized jointly by the Institute of Law of Chinese Academy of Social Sciences and Law Faculty of Utrecht University, The Netherlands. The contributions of the European experts explore different systems of regulation that have developed and which are accommodated within the legal framework and traditions of each particular country. The aim of the volume is to stimulate international understanding of the progress made by China and the dilemmas it still faces with respect to its emerging new civil society organizations. [Diplomacy: Theory And Practice](#) Jiemin Yang, 2013-12-24 This book offers a comprehensive review of the Communist Party of China's approach to diplomacy through an extensive evaluation of the major practices and theories behind the Party's diplomacy with its main achievements in its 90 years of diplomacy highlighted. It delves into the views held by the Communist Party of China on the changing times, the international system, national interests and developments in China's diplomacy. Other topics covered at length include China's traditional and non traditional diplomatic practices as well as basic characteristics of the Party's diplomacy. Few books have touched on the Communist Party of China's diplomatic history in detail. [China's Diplomacy Theory and Practice](#) fills the gap by shedding insights on the Communist Party of China's global strategies and diplomatic planning contributing to the building of an international relations theory with Chinese characteristics. Readers will gain a deeper understanding of China's international relations from the forward looking analyses on the Party's core role in leading China's diplomacy and the theoretical explanations behind the practices. **China and International**

**Human Rights** Na Jiang, 2013-12-12 This book is designed to introduce law students, legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China's participation in the international human rights system albeit with inherent challenges. From an international and comparative perspective, one of the key findings of the author's research is that progress towards human rights depends more on judges than on legislators. Chinese legislators have enacted a series of reforms in order to better protect human rights. Unfortunately

these reforms have not led to greater adherence to China's international human rights obligations in practice. The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms. Specifically, this book will examine how judicial misunderstandings have blocked reforms in one specific area: the use of severe punishments based on international human rights theory and case studies and data analyses. This examination has several purposes. The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re-applying to be a member of the UN Human Rights Council in the future. The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China's human rights obligations. The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements. The author's ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government, between Chinese judges and their foreign counterparts, and between China's government and the international community. Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re-examine trends in its developing human rights policy after standing down from the Council in late 2012. The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards. Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR. In order to better educate and train judges, this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective. To illustrate how Chinese justice currently falls short of international norms, this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law. These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty, forced labor, and torture.

*China's Economic System* Audrey Donnithorne, 2013-10-18. First published in 1967. Based on original Chinese sources including the press and government documents, this book describes the operation of the Chinese economy in the twentieth century. Certain trends become apparent, notably the extent to which China's economic life is decentralized and the tendency towards self-sufficiency within provinces and smaller administrative units. Among the topics covered are Agriculture, the organization of large and small scale industry, mining and transport management, and labour in state enterprises. The fiscal system, together with the operation of the banks and the control of currency, credit, and prices, and economic planning are also discussed.

**Foreign Agriculture**, **China's Cold War Science Diplomacy** Gordon Barrett, 2022-08-25. During the early decades of the Cold War, the People's Republic of China remained outside much of mainstream international science. Nevertheless, Chinese

scientists found alternative channels through which to communicate and interact with counterparts across the world beyond simple East West divides By examining the international activities of elite Chinese scientists Gordon Barrett demonstrates that these activities were deeply embedded in the Chinese Communist Party s wider efforts to win hearts and minds from the 1940s to the 1970s Using a wide range of archival material including declassified documents from China s Ministry of Foreign Affairs Archive Barrett provides fresh insights into the relationship between science and foreign relations in the People s Republic of China
