All Possible Wars Toward A Consensus View Of The:

QDR 2001: Strategy-Driven Choices for America's Security , US-China Strategic Competition S. Mahmud Ali,2015-05-14 This book examines the nature and consequences of strategic competition between the US and China which affects the global security landscape and the emerging security architecture across the broader Asia Pacific region The author illustrates the evolution of Sino US security interactions from the anti Soviet alliance to temporary marginalization to eventual strategic competition and examines cases that could potentially escalate into greater conflicts The analysis offers tantalizing glimpses into both the dangers and promising opportunities presented by this strategic fork in the road making it of great interest to researchers and scholars in the fields of international relations and security studies **Joint Force Quarterly** ,2009 **Anti-Access Warfare** Sam Tangredi,2013-10-15 The book is the definitive conceptual and historical introduction to the concept of anti access strategies Unlike current studies it is not simply technology focused Nor is it primarily intended as critique of the current Air Sea Battle concept It combines conceptual thinking with historical examples and potential scenarios in order to identify options for future defense planning Strategies of anti access also known as area denial more recently combined into the awkward acronym A2 AD are presumed to be the primary threats to the employment of U S military forces in overseas crises This presumption has gradually evolved into a joint concept of operational access Anti access capabilities appear to be the current military posture of the People s Republic of China and Islamic Republic of Iran The study of anti access or area denial strategies for use against American power projection capabilities has strong naval roots which have been largely ignored by the most influential commentators In reality denial of access was the Soviet Navy s operational objective during the Cold War The first use of the actual anti access term can be traced to a series of anti Navy studies by the Office of Net Assessment designed to examine the ability of the U S Navy to carry out its Maritime Strategy and later From the Sea strategic vision Sustained long range power projection is both a unique strength of U S military forces and a requirement for an activist foreign policy and forward defense In more recent years the logic of the anti access approach has been identified by the Department of Defense as a threat to this U S capability and the joint force countering it is one of the defense priorities identified in the President s directions issued this past January In addition to potential regional powers a number of think tanks have suggested that non state actors such as terrorist organizations are developing anti access area denial capabilities The book s conclusions differ from most commentary on anti access Rather than a technology driven post Cold War phenomenon the anti access approach has been a routine element of grand strategy used by strategically weaker powers to confront stronger powers throughout history But they have been largely unsuccessful when confronting a stronger maritime power Although high technology weapons capabilities enhance the threat they also can be used to mitigate the threat Rather than arguing against reliance on maritime forces presumably because they are no longer survivable the historical analysis argues that maritime capabilities are key in breaking the great walls **The**

Politics of Maritime Power Andrew T. H. Tan, 2010-10-18 Since the crucial maritime battles that were fought during the Second World War in both the Atlantic and Pacific Oceans and the post war period which saw a naval standoff between a vast US navy and a growing Soviet navy the focus of international maritime power has changed Major maritime powers have deployed warships aircraft carriers and heavy land forces around the globe for purposes of diplomacy such as in maintaining far flung alliances for deterrent purposes such as in the Taiwan Straits for warfighting such as in its crucial support roles in recent conflicts in Afghanistan and both Gulf Wars and for complex emergencies such as tsunami and earthquake rescue in Indonesia and Pakistan Increasingly maritime power is employed in counter terrorism such as in joint patrols counter terrorism exercises and in intercepting ships suspected of carrying weapons of mass destruction The Politics of Maritime Power is an exploration of the contemporary facets of maritime power particularly as an instrument of the state in the post Second World War era This reference volume is divided into four parts with chapters exploring various aspects of modern maritime power written by maritime experts a series of maps which show major maritime zones a glossary which contains over 240 entries on various aspects of maritime power and a detailed bibliography *Parameters*, 2003

All Possible Wars? Sam J. Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards *All Possible Wars? War College Review ,2010 **Threat and Risk Analysis in the Context of Strategic Forecasting** Michael Hough, Anton Du Plessis, George P. H. Kruys, 2008 This publication presents a concise introduction to threat and risk analysis the use and construction of scenarios the role of intelligence and early warning and political forecasting and state decay Publisher s description Challenging Transformation's Clichés Antulio J. Echevarria (II), 2006 Critical thinkers analyze and refine ideas underpinning the foundation of American defense policy and military strategy today so the defense community can apply them in strategy and force development This is an ongoing process new ideas emerge are tested and adopted revised or discarded The author challenges some of the accepted notions that have become foundational to contemporary theories of military transformation In his view any endeavor as resource intensive as military transformation is too important to rest on uncontested truths **Journal of the United Service Institution of India** United Service Institution of India, 2002 **Security Sector Reform and Post-conflict Peacebuilding** Albrecht Schnabel, Hans-Georg Ehrhart, 2005 Military and police forces play a crucial role in the long term success of rebuilding efforts in post conflict societies Yet while charged with the long term task of providing a security environment conducive to rebuilding war torn societies internal security structures tend to lack civilian and democratic control internal cohesion and effectiveness and public credibility They must be placed under democratic control and restructured and retrained to become an asset not a liability in the long term peacebuilding process External actors from other nations regional organizations and the United Nations can be of assistance in this process by creating a basic security environment preventing remnants of armed groups from spoiling the fragile peacebuilding process and by facilitating reform of the local security sector This book offers examples and analyses by an international group of academics and practitioners with direct experiences with security sector reform programs The case studies offer the reader a useful laboratory in which comparisons can be made and observations tested It will be useful to policymakers interested in understanding the complexity of addressing security sector reform and civil military relations W Andy Knight University of Alberta Canada Globalization and Maritime Power Sam J. Tangredi, 2002 **An Enduring Framework for Assessing the Contributions of Force Structure to a Coercive Strategy** Eric A. Beene, 2002 The US Department of Defense is still struggling to define itself in the post Cold War age over a decade after the new period has begun With a strategy and force structure review occurring on average every two years the military has still not been able to generate a consistent basis on which to justify its force structure or its strategy This paper uses a decision analysis framework as a foundation for creating such a basis Instead of depending on leadership for guidance which changes with destabilizing regularity this paper relies on the theories of coercion that began in the Cold War era These theories have particular value today especially in light of the many innovations the nation has undertaken in the past decade Modified and translated for modern conventional warfare these theories form the basis for a framework of enduring requirements for any military force that undertakes a coercive strategy This paper develops this framework to the operational level of analysis and

it is applied to two developmental air platforms the Global Hawk Endurance Unmanned Aerial Vehicle and the Unmanned Combat Air Vehicle The unique contributions of these two platforms become apparent using this framework and the value of the framework is depicted as it points to areas for future improvement in these systems Finally the paper makes a comparison between this framework and traditional analyses and strategy review processes and it shows the unique and enduring value of this analytical framework for assessing the contributions of air power platforms

War and Intervention Michael V. Bhatia, 2003 Explains developments in recent peacekeeping operations and politico military environments Bridges the gap between peace and conflict scholarship Highlights new aspects of war studies Following over a decade of substantial and extensive American military involvement peace operations have passed from a position of strategic irrelevance to one of strategic importance War and Intervention provides a snapshot of the contemporary environment of peace operations in terms of both war and intervention It also answers two broad questions 1 What are key characteristics of armed competitors in the current environment of peace operations particularly in terms of their structure and organization financing access to military resources and the tactical tools and methods applied by these movements And 2 What are key recent developments in the dimensions and methods of intervention particularly regarding the use of force the adaptation of global militaries to peace operations and the emerging political legal and economic components of intervention War and Intervention allows readers from a range of domains military academic humanitarian political and diplomatic to understand the priorities and methods of different actors in today s peace operations
